## ***The Impact of Population Growth on Well-being in Developing Countries 1996-03-18***

this book examines the nature and significance of the impact of population growth on the well being of developing countries in particular the effects on economic growth education health food supply housing poverty and the environment in addition because family planning programmes often significantly affect population growth the study examines the impacts of family planning on fertility and health and the human rights implications of family planning programmes in considering the book's conclusions about the impact of population growth on development four caveats should be noted first the effects of population growth vary from place to place and over time thus blanket statements about overall effects often cannot be made where possible the authors note the contexts in which population effects are strongest and weakest second all of the outcomes examined in this book are influenced by factors other than population growth moreover the impact of population growth may itself vary according to the presence or absence of other factors this again makes blanket statements about the effects of population growth difficult throughout the chapters the authors try to identify other relevant factors that influence the outcomes we discuss or that influence the impact of population growth on those outcomes

## ***The Impact of Population Growth on Well-being in Developing Countries 2012-12-22***

this book examines the nature and significance of the impact of population growth on the well being of developing countries in particular the effects on economic growth education health food supply housing poverty and the environment in addition because family planning programmes often significantly affect population growth the study examines the impacts of family planning on fertility and health and the human rights implications of family planning programmes in considering the book's conclusions about the impact of population growth on development four caveats should be noted first the effects of population growth vary from place to place and over time thus blanket statements about overall effects often cannot be made where possible the authors note the contexts in which population effects are strongest and weakest second all of the outcomes examined in this book are influenced by factors other than population growth moreover the impact of population growth may itself vary according to the presence or absence of other factors this again makes blanket statements about the effects of population growth difficult throughout the chapters the authors try to identify other relevant factors that influence the outcomes we discuss or that influence the impact of population growth on those outcomes

## ***The Policy Impact of Universities in Developing Regions 1988-06-18***

an examination of the role of universities in developing regions the themes include the development role of a university in peripheral regions as diverse as northern sweden and southern israel and the role of universities in training professional administrators and doctors

## **Evaluating the Impact of Development Projects on Poverty *2000***

despite the billions of dollars spent on development assistance each year there is still very little known about the actual impact of projects on the poor there is broad evidence on the benefits of economic growth investments in human capital and the provision of safety nets for the poor but for a specific program or project in a given country is the intervention producing the intended benefits and what was the overall impact on the population could the program or project be better designed to achieve the intended outcomes are resources being spent efficiently these are the types of questions that can only be answered through an impact evaluation an approach which measures the

outcomes of a program intervention in isolation of other possible factors this handbook seeks to provide project managers and policy analysts with the tools needed for evaluating project impact it is aimed at readers with a general knowledge of statistics for some of the more in depth statistical methods discussed the reader is referred to the technical literature on the topic chapter 1 presents an overview of concepts and methods chapter 2 discusses key steps and related issues to consider in implementation chapter 3 illustrates various analytical techniques through a case study chapter 4 includes a discussion of lessons learned from a rich set of good practice evaluations of poverty projects which have been reviewed for this handbook

## **Evaluating the Impact of Training and Institutional Development Programs 1998**

this manual focuses on measuring the effects of training and institutional development programs on individuals the organizations or economic sectors in which they work and the welfare of the larger community it presents a conceptual framework as well as real life examples drawn from evaluations of the economic development institute s learning and capacity building programs in the developing world it provides practical advice on developing evaluation plans designing questionnaires conducting interviews analyzing data reporting findings and making recommendations emphasis is placed on the active participation of stakeholders throughout the process

## **Conducting Environmental Impact Assessment in Developing Countries 1999**

the third assessment report of the intergovernmental panel on climate change ipcc has presented strong evidence that human induced climate change is occurring and that all countries of the world will be affected and need to adapt to impacts the ipcc points out that many developing countries are particularly vulnerable because of their relatively low adaptive capacity therefore it is seen as a development priority to help these countries enhance their adaptive capacity to climate change the potsdam institute for climate impact research and stratus consulting organized a workshop in the fall of 2001 to develop an agenda for research on how best to enhance the capacity of developing countries to adapt to climate change this research agenda is relevant for governments and institutions that wish to support developing countries in adapting to climate change the workshop brought together experts from developing and industrialized countries non governmental organizations and multilateral and bilateral donor organizations to discuss a number of important topics related to adaptation adaptive capacity and sustainable development a dozen papers were commissioned to cover these topics both from a theoretical perspective and in the form of national case studies the papers form the basis for this important book which presents the latest interdisciplinary knowledge about the nature and components of adaptive capacity and how it may be strengthened a

the series studies on modern orient provides an overview of religious political and social phenomena in modern and contemporary muslim societies the volumes do not only take into account near and middle eastern countries but also explore islam and muslim culture in other regions of the world for example in europe and the us the series studies on modern orient was founded in 2010 by klaus schwarz verlag

## **Impacts of Participatory Development in Afghanistan: A Call to Reframe Expectations 2020-08-10**

this book provides researchers students and practitioners with a methodology to evaluate the

impacts of a wide diversity of development projects and policies on local economies projects and policies often create spillovers within project areas lewie uses simulation methods to quantify these spillovers it has become a complement to randomized control trials rcts as governments and donors become interested in documenting impacts beyond the treated comparing the likely impacts of alternative interventions and designing complementary interventions to influence program and policy impacts it is also a tool for impact evaluation where rcts are not feasible chapters 1 4 motivate and present the basics of impact simulation including how to design a lewie model how to estimate the model and how to obtain the necessary data the remaining chapters provide a diversity of interesting real world applications and extensions of the basic models the applications include evaluations of the impacts of cash transfers for the poor ecotourism global food price shocks irrigation projects migration and corruption each chapter provide readers with the tools they need to conduct their own local economy wide impact evaluations all models and data used in this book are available on line

## **Beyond Experiments in Development Economics 2014-07-10**

evaluating environmental and social impact assessment in developing countries second edition outlines an evaluation framework that supports environmental professionals researchers and academics in evaluating the effectiveness of impact assessment within limited budgets promotes standardization across the field and helps determine if environmental impact assessment eia is achieving its intended goal of sustainable development using bangladesh as a case study the book discusses key processes highlights the need for an integrated holistic approach outlines the current institutional framework and discusses environmental impact social impact community participation and the implementation of mitigation measures this new edition provides a fully updated picture of both recent changes and ongoing development in process such as the growth in social wellbeing community participation and enhanced auditing finally the challenges still facing eia and sia evaluation are addressed as robustly as possible outlines the latest updates on how eia and sia outcome assessment systems are being incorporated highlights the surge in growth of community participation in eia and gives valuable insights into the methods and techniques being used to successfully harness this phenomenon provides updated case studies that demonstrate how the evaluation framework has been applied revealing the challenges changes failures and successes that have taken place on these projects since the first edition

## **Evaluating Environmental and Social Impact Assessment in Developing Countries 2018-07-17**

this book considers the process of impact assessment and shows how and why it needs to be integrated into all stages of development programmes in depth case studies are included and show a variety of approaches

## **Evaluation in the Practice of Development 2008**

this book deals with issues and concerns for the human environment in the developing countries incorporating natural processes and systems pollution removal technology energy conservation environmental impact assessment process economics culture political structure and societal equity from a management point of view solutions to the emerging problems of the environment need a paradigmatic shift in approach from a process based model to a socio political economic model hence environmental management should involve equality and control over use of the finite natural resources and the balance between earth s biocapacity and humanity s ecological footprint changes such as green technologies human population stabilization and adoption of ecologically harmonious lifestyles are absolutely essential and will require redesigning of political institutions policies and revisiting forgotten skills of sustainable practices of environmental management these challenges should centre on environment governance using the concepts of common property equity and security this book is relevant for academics professionals administrators and policy makers who are concerned with various aspects of environment management and governance

## **Impact Assessment for Development Agencies 1949**

China's growing economic involvement in sub-Saharan Africa and Latin America has been a source of major controversy. The official Chinese position maintains that the growth of bilateral relations is of mutual benefit and provides a good example of South-South cooperation. Critics on the other hand see the economic relations between China and other developing countries as highly unequal with most of the benefits accruing to China and a few local elites. They also point to negative socio-economic, political and environmental consequences. How China is reshaping the global economy. Development impacts in Africa and Latin America throws more light on these controversies through a comparative study of China's impact on the two regions. It looks not just at bilateral relations between China and the two regions but also analyses the changes in the global economy brought about as a result of the shift in economic activity from North America and Western Europe to Asia. This book looks at the factors which led to rapid economic growth in China and the way in which this has affected global manufacturing commodity markets, the international presence of Chinese companies and financial flows. It examines the different forms of Chinese economic involvement in sub-Saharan Africa and Latin America, the main drivers and economic, social, political and environmental consequences. It ends with a comparison of the two regions that highlights the importance of different histories and political and institutional contexts in determining the impacts of China. Since the first edition of *How China is Reshaping the Global Economy: Development Impacts in Africa and Latin America*, China's role in the global economy has continued to expand and the Chinese government's foreign policy has become more assertive. The global presence of China has been marked by the expansion of the Belt and Road Initiative to almost 150 countries and the trade war between the US and China as well as increased Western concerns over the activities of major Chinese companies such as Huawei. This new edition documents these changes and their implications for SSA and LAC.

## **Community Development 2006**

This volume aims to develop a framework for disaster and climate risk resilient livelihood system in Bangladesh using a policy oriented approach. It highlights the possible impacts of climate change on groundwater based irrigation in the country. Climate change is one of the biggest challenges to society. It can lead to serious impacts on production, life and environment on a global scale. Higher temperatures and sea level rise will cause flooding and water salinity problems which will bring about negative effects on agriculture and high risks to industry and socio-economic systems in the future. Climate change will lead to many changes in global development and security especially energy, water, food, society, job, diplomacy, culture, economy and trade. The Intergovernmental Panel on Climate Change (IPCC) defines climate change as any change in climate over time, whether due to natural variability or as a result of human activity. Global climate change has emerged as a key issue in both political and economic arenas. It is an increasingly questioned phenomenon and progressive national governments around the world have started taking action to respond to these environmental concerns.

## **Environmental Management: Issues and Concerns in Developing Countries 2021-03-17**

Project sustainability has received considerable attention in recent years. The increased awareness stems from a growing concern with social development issues such as poverty reduction, project sustainability, the equal participation of women and the social costs of economic development. This handbook provides a comprehensive guide to the wide range of techniques available for monitoring and evaluating the main kinds of social development programs. The authors highlight or review a number of topics that have been overlooked in earlier evaluation publications such as the organization of monitoring and evaluation at the project, sectoral and national levels, the management of the databases required to select, design and implement new social projects and programs, the monitoring and evaluation of project sustainability, simple and cost-effective methods of estimating project impact. The authors also discuss methods for identifying potential beneficiaries.

and their information needs and ways of managing evaluations

## **The Economic and Social Impact of International Tourism on Developing Countries 1979**

at the beginning of the 1970 s global grain reserves were level and food prices were low however as the decade progressed crop production plummeted leading to a food crisis originally published in the aftermath in 1977 crosson and frederick set out to explore the ability of agricultural output to meet the global food demands of future generations this study analyses how resources and environmental factors would affect food production in developing countries and the united states until the end of the 21st century the environmental impacts of land levels fertiliser and pesticide

use are explored in relation to the challenges of meeting food demands this title will be of interest to students of environmental studies

## **Collective Impact and Community Development Issues** **2018-10-30**

ordinary people community leaders and even organizations and corporations still do not fully comprehend the interconnected big picture dynamics of sustainability theory and action in exploring means to become more sustainable individuals and groups need a reference in which to frame discussions so they will be relevant educational and successful when implemented this book puts ideas on sustainable communities into a conceptual framework that will promote striking transformational effects on decision making in this book practitioners and community leaders will find effective comprehensive tools and resources at their finger tips to facilitate sustainable community development scd the book content examines a diverse range of scd methods assessing community needs and resources creating community visions promoting stakeholder interest and participation analyzing community problems designing and facilitating strategic planning carrying out interventions to improve

## **□□□□□□□□□□ 2003-02**

outlines significant research problems methods and strategies used in community development demonstrating the way in which research inspires and derives from activity

## **The World Food Situation 2016-03-17**

a comparative study of the impact of increased modernization in the rural sectors of six important developing countries

## **Practice of Sustainable Community Development** **2012-10-18**

this book presents a comprehensive overview of the history definition causes effects impacts and implications of climate change on young people globally with a focus on small island communities sids in particular the text highlights the key problems associated with the impact of climate change on young people in sids specifically its effects on socio economic development and livelihoods and explores the need for the development of a new conceptual framework to deal with building the resilience of the adaptive capacity of youth in sids the book analyzes the strengths and weaknesses of the emerging phenomenon of global youth climate change movements actions and examines the management governance challenges associated with the movement in terms of its operational mechanism mobilization strategies and its use of social media technology to mobilize mass action the text concludes with a recommendation for further research in this area as a way to understand how the movement functions and its mechanism for implementation of future research

## **Mitigating Socioeconomic Impacts of Energy Development** **1982**

the rapidly increasing number of threatened flora and fauna species worldwide is one of the chief problems confronting environmental professionals today this problem is largely due to the impact humans have had on land use through development e g agricultural residential industrial infrastructure and mining developments the requirement for developers to implement measures to reduce the impacts of development on wildlife is underpinned by government legislation a variety of measures or strategies are available to reduce such impacts including those to reduce impacts on flora and fauna

## **Privatization in Developing Countries 1995**

suitable for undergraduate level this is a market leading development textbook

## **Potential Impacts of Crop Technology in Developing Countries 2000**

challenges of the developing world is a lively up to date and highly readable introduction to the key dynamics and issues of political economic and social development in the developing countries of africa asia the middle east and latin america

## **Evaluating Social Projects in Developing Countries 1979**

this book proposes an original critical theory of environmental sociology which is verified through actual projects relating to infrastructure development the author locates each development project in its social institutional and historical contexts and explains their outcomes as the consequence of the actions of various individuals and groups each acting rationally to optimise their own interests six infrastructure development projects are covered ranging from eco tourism and amusement parks to power and mining projects abatement of industrial pollution and urban transportation interactions between project affected persons paps the promoters of each project and government agencies are analysed at different stages of the projects this book is an important contribution to assessing the socio cultural and environmental impacts of development projects

## **Community Development Research 1979**

this book presents a variety of climate change impact and mitigation strategies for different environments in india these include fractional snow cover change in the himalayan region and the impact of frequent cyclonic storms on land use and land cover changes along coastal areas the book explores watershed surface water and hydrologic conditions for urban storm water drainage as well as trend analysis of precipitation and a statistical approach to detect rainfall trends the book starts with a critical review of climate change diplomacy adaptation and mitigation strategies in south asian countries it also covers the role of natural gas in energy security there are chapters pertaining to farmer s perception on the impact of climate change as well discussion on land use change and ecological implications many geographical areas are covered including the mahananda river basin pindar basin kumaun himalaya the upper tapi river basin southern kerala districts uttar pradesh karnataka state telangana state tamil nadu state to name a few

## **New Technology and Rural Development 1990**

large scale industrial and energy development projects are profoundly affecting the social and economic climate of rural areas across the nation creating a need for extensive planning information both to prepare for the effects of such developments and to meet state and federal environmental impact assessment requirements this book examines alternative methods of modelling the economic demographic public service fiscal and social impacts of major development projects the authors provide a synthesis of the conceptual bases estimation techniques data requirements and types of output available focusing on models that address multiple impact dimensions and produce information at the county and subcounty levels they also look at the kind of data each model produces in each impact category

## **Impacts of Climate Change on Young People in Small Island Communities 2020-10-27**

large scale development projects oftentimes end up creating negative impacts that affect vulnerable populations with particular intensity projects likely to displace families from their homes

degrade the living conditions of indigenous peoples or intensify social conflicts at local levels are not uncommon social safeguards are intended to prevent these and other unintended impacts and when the impacts cannot be averted to develop appropriate measures to mitigate them however the practical implementation of social safeguards is plagued with a series of structural problems the collection of stories from the field presented in this book illustrates the principles and application of social safeguards in the context of projects funded by multilateral banks identifying key challenges in their implementation and exploring paths to overcome those limitations
