Tactics: The Practical Art Of Leading Troops In War

2022-10-27

excerpt from technique of modern tactics a study of troop leading methods in the operations of detachments of all arms the cordial reception that has been accorded this volume by the army the marine corps the national guard military schools training camps etc has made necessary a second and third editions the present edition embodies the essential modifications contained in the 1914 f s r and the act of june 3 1916 the chief reason leading to the publication of the volume in the first instance was the authors belief that the excellent instruction given at the leavenworth schools should be disseminated to the widest extent practicable among all those in the united states who are charged with preparation for the active physical defense of the nation to assist in such an extension of military education there seemed a need for a volume which would collect and make available within a small compass the fruits of the study observation and experience of those officers who have unceasingly devoted themselves to the improvement of american tactical training it is well that the traditional indifference of the american people toward military preparedness is in this day being rudely disturbed fate has hitherto been lenient to the growing american nation it has not demanded the full or the logical forfeit proportionate to the laxity displayed by us in meeting former crises in the revolution fate was indeed kind to the colonists in the war of 1812 it awarded us greatly more than our efforts merited and seemed to overlook the pitiful inefficiency of our land forces at sea the brilliant series of naval exploits was made possible only by the unfaltering determination of the naval chieftains serving under a supine administration that desired to lock up the navy in home ports in the mexican war in permitting us to conduct two campaigns without the loss of a single battle and in spite of a woeful deficiency in men in equipment and in administrative support fate was more than indulgent in the civil war fate did not assess the full retribution of disruption of the union which it might logically have done but it did exact for our neglect of preparation an immense payment in blood and treasure this indulgence of fate may be not wholly a kindness about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do

however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

An Introduction to Behavioural Ecology

2012-02-17

in late 2017 and early 2018 south africa and zimbabwe both experienced rapid and unexpected political transitions in zimbabwe robert mugabe the only leader the country had ever known was replaced in a soft coup by his erstwhile vice president emmerson mnangagwa over a twelve day period in february 2018 south african president jacob zuma was prematurely forced from office by his former deputy president cyril ramaphosa the widespread popular rejoicing that accompanied their arrival compounded the shock of these sudden transitions new leaders new dawns explores these political transitions and the way they were received contributors consider how the former liberation heroes mugabe and zuma could have fallen so low the underlying reasons for their ouster what happened to their liberation movements turned ruling parties and perhaps most importantly what the rise to power of

ramaphosa and mnangagwa foreshadowed bringing together fourteen leading international scholars of southern africa and adopting a political economy framework this volume argues that the changes in leadership are welcome but insufficient while the time had come for zuma and mugabe to go there is little in the personal histories or early policy actions of ramaphosa and mnangagwa that suggests they will be capable of addressing the profound social economic and political problems both countries face new leaders new dawns reveals that despite what these new leaders may have promised a new dawn has not yet arrived in southern africa

Tactics

2013-11

since the end of the cold war transnational non state forces have been a major source of global instability with many ominous and disruptive flows of people goods and services moving readily across international boundaries and because these activities are so multifaceted and so intertwined within the fabric of society they remain largely invisible until the intrusion is well advanced and difficult to reverse thus the threat posed by transnational organized crime ultimately undermines the total security of countries including the economic cultural and political dimensions and now presents an international security challenge of staggering proportions surprisingly no single book so far has fully addressed the scale of this threat to global stability from an international security perspective in an attempt to rectify that failure dark logic examines in depth when and how transnational organized crime is likely to use corruption and violence to achieve its ends and when and how these criminal activities most affect individual and state security even more important it pinpoints when and how the negative consequences of these tactics and activities can be most successfully combated in so doing it provides a unique lens for analyzing today s global security dilemmas given that the threat associated with transnational organized crime can endanger all citizens from policy makers and security analysts to students scholars and the man and woman on the street this book is written in an intelligible and jargon free style to make it accessible to anyone interested in the ever growing catalog of threats to national and international security
