The Practical Guide to Classroom Literacy Assessment 1989

science is often a forgotten subject in early elementary grades as various mandates require teachers to focus on teaching young students to achieve specific reading and mathematical competencies this book offers specific examples and empirical evidence of how integrated science literacy curriculum and teaching in urban primary grade classrooms give students opportunities to learn science and to develop positive images of themselves as scientists the integrated science literacy enactments isle approach builds on multimodal multidimensional and dialogically oriented teaching and learning principles readers see how as children engage with texts material objects dialogue ideas and symbols in their classroom community they are helped to bridge their own understandings and ways with words and images with those of science in doing so they become learners of both science and literacy the book features both researcher and teacher perspectives it explores science learning and its intersection with literacy development in schools that educate predominately children of color many of whom struggle with poverty and have been traditionally underestimated underserved and underrated in science classrooms in all these ways this volume is a significant contribution to a critically under researched area of science education

Literacy 2000 2017-02-01

in 1750 half the population were unable to sign their names by 1914 england together with handful of advanced western countries had for the first time in history achieved a nominally literate society this book seeks to understand how and why literacy spread into every interstice of english society and what impact it had on the lives and minds of the common people

Engage Literacy Teachers Resource Extended Edition Level 15-20

1989

this book provides an introduction to poststructural and posthumanist theories in order to imagine new possibilities for expanding literacy education the authors put to work these theories in the context of an elementary school classroom examining literacy based activities that occur as students participate with materials in a multimedia writers studio focusing on literacy processes the book emphasizes the fluid and sometimes unintentional ways multimodal artifacts come into being through intra actions with human and nonhuman materials because these theories emphasize the unplanned nonlinear aspects of literacy the authors demonstrate an approach to literacy that works against the grain of standardization and rigid curricular models go be a writer reveals that when educators appreciate the value of unscripted intra actions they allow for more authentic learning

Literacy 2000: What's around the corner? 2019-10-21

in recent years narrative skills have been receiving increasing attention from researchers for their relevance in the development of language literacy and socio cognitive abilities this volume brings together studies focusing on two key issues in the development of children s narrative skills the first part of the volume addresses the issue of the interrelatedness between narrative skills and literacy language and socio cognitive development as well as of the impact of narrative practices on the promotion of these different skills the second part of the volume addresses the issue of how early interactional experiences particular contextual settings and specific intervention procedures can help children promote their narrative skills the studies span a wide age range from toddlers to late elementary school children concern different languages dutch english french german hebrew and italian and consider narrative skills and practices from a rich variety of theoretical and methodological approaches

Genre-Based Strategies to Promote Critical Literacy in Grades 4-8 2002

research on the development on written language and literacy is inherently multidisciplinary in this book leading researchers studying brain cognition and behavior come together in revealing how children develop written language and literacy why they may experience difficulties and which interventions may help those who struggle each chapter provides an overview of a specific area of expertise focusing on typical and atypical development providing steps for future research and discussing practical implications of the work the book covers areas of bilingualism dyslexia reading comprehension learning to read atypical populations intervention and new media thus the book presents a comprehensive overview of the current state of affairs in this field of research the various book chapters have been written by researchers who all have collaborated at some point in their careers with ludo verhoeven whose research sets the example for the importance of crossing disciplinary borders to research to take the next important steps the combination of the research in this book sets the stage for future research that connects various fields and hopes to inspire anyone interested in the development of written language and literacy
