Non-governmental Organizations and Natural Resource Management in Africa 1992 this book provides a broad and well integrated overview of recent major scientific results in wetland science and their applications in natural resource management issues the contributors internationally known experts summarize the state of the art on an array of topics divided into four broad areas the role of wetlands for integrated water resources management putting theory into practice wetland science for environmental management wetland biogeochemistry wetlands and climate change worldwide

Beyond Proprietorship 2008-12-31 participatory processes for natural resource management ortwin renn university of stuttgart stuttgart germany need for analytic deliberative processes inviting the public to be part of the decision making process in natural resource management has been a major objective in european and american environmental policy arenas the us national academy of sciences has encouraged environmental protection agencies to foster citizen participation and public involvement for making environmental policy making and natural resource management more effective and democratic stern and fineberg 1996 the report emphasizes the need for a combination of assessment and dialogue which the authors have framed the analytic deliberative approach unfortunately early public involvement of the public in deliberative processes may compromise however the objective of efficient and effective policy implementation or violate the principle of fairness cross 1998 okrent 1998 another problem is that the public consists of many groups with different value structures and preferences without a systematic procedure to reach consensus on values and preferences the public's position often appears as unclear coglianese 1997 rossi 1997 participatory processes are thus needed that combine technical expertise rational decision making and public values and preferences how can and should natural resource managers collect public preferences integrate public input into the management process and assign the appropriate roles to technical experts stakeholders i e

A New Century for Natural Resources Management 1995-03 natural resources and the environment economics law politics and institutions provides a new approach to the study of environmental and natural resource economics it augments current contributions from the fields of public choice law and economics and the burgeoning field of what used to be called the new institutional economics to describe explain and interpret how these new developments have been applied to better understand the economics of natural resources and the environment this textbook takes a multi disciplinary approach which is essential for understanding complex environmental problems and examines the issue from not only an economic perspective but also taking into account law politics and institutions in doing so it provides students with a realistic understanding of how environmental policy is created and presents a comprehensive examination of real world environmental policy the book provides a comprehensive coverage of key issues including renewable energy climate change

agriculture water resources land conservation and fisheries with each chapter accompanied by learning resources such as recommended further reading discussion questions and exercises this textbook is essential reading for students and scholars seeking to build an interdisciplinary understanding of natural resources and the environment

Numerical Methods and Constitutive Modelling in Geomechanics 1990 the looming depletion of non renewable resources has increased the global land grab in the past decade so far however the question of how and when people can influence economic outcomes has received little attention in the study of social movements based on in depth ethnographic field research since 2003 in the industrial forestry expansion frontiers in brazil and elsewhere in the global south this book presents a novel theory to explain how the interaction between resistance companies and the state determines investment outcomes the promotion of contentious agency by organizing and politicizing campaigning protesting networking and engaging in state and corporate remediated politics whilst maintaining autonomy is central to explaining how impacted people influence resource flows and block or slow projects they deem harmful to their livelihoods and the environment the conflicts between globalizing paper and pulp corporations and the landless peasants indigenous communities and other parties with alternative projects for the planet s future are studied to illustrate how a great transformation can be built upon progressive counter movements this systematic comparison of several cases illustrates the broader principles and problems endemic to the global political economy contentious agency and natural resource politics will be of strong interest to students and scholars of international relations international political economy environmental studies environmental politics sociology and social movement studies

Stakeholder Dialogues in Natural Resources Management 2010-10-28 to manage our environment sustainably professionals must understand the quality and quantity of our natural resources statistical analysis provides information that supports management decisions and is universally used across scientific disciplines statistics in natural resources applications with r focuses on the application of statistical analyses in the environmental agricultural and natural resources disciplines this is a book well suited for current or aspiring natural resource professionals that are required to analyze data and perform statistical analyses in their daily work more seasoned professionals that have previously had a course or two in statistics will also find the content familiar this book can also serve as a bridge between professionals that understand statistics and want to learn how to perform analyses on natural resources data in r

Natural Resources and the Environment 2021 redefining diversity and dynamics of natural resources management in southeast asia volumes 1 4 brings together scientific research and policy issues across various topographical areas in asia to provide a comprehensive overview of the issues facing this region natural resource dynamics and social ecological systems in central vietnam development resource changes and conservation issues volume 3 focuses on the issues specific to central vietnam that are also found globally war had significantly impacted both land and water resources from which it had to recover environmentally additionally this is an area with growing urbanization pressures and industrial development both of which are known for stretching resources beyond their limits the introduction of several hydro electric power projects have even further eroded the local agricultural and forest ecosystems this volume looks at central vietnam holistically from management and use to policy and data driven solutions provides land management practitioners and policy makers with the tools to deal with natural resource issues in a developing nation reviews the impacts of the first pes payment for ecosystem services policies upon which were based similar programs in latin america reviews the current and potential future land management of central vietnam giving an eye to solutions for any nation impacted by war trying to balance development with conservation efforts and provide their populations with sustainable economic futures examines central vietnam holistically from management and use to policy and data driven solutions

Contentious Agency and Natural Resource Politics 2013-11-26 this book applies cost benefit analysis techniques in the management of environment and natural resources in developing countries of the southeast asian region and presents a compendium of studies conducted by researchers supported by the economy and environment program for southeast asia eepsea it emphasizes the close relationship between the environment and natural resources and economic development in such countries addressing a wide range of problems that can be understood using economic evaluation techniques general guidelines for conducting economic appraisals are provided with the case studies illustrating how they can be applied in a developing country context cost benefit analysis application in environmental and natural resource management in southeast asia serves as essential reading for teachers researchers students and practitioners in environmental and natural resource economics economic development and key issues facing policymakers in the southeast asian region

Statistics in Natural Resources 2022-08 first published in 2008 routledge is an imprint of taylor francis an informa company

Redefining Diversity and Dynamics of Natural Resources Management in Asia, Volume 3 2016-09-13 this book explores the nexus between natural resources ownership and the right to development in africa the right to sovereignty over natural resources and the right to development are recognised and protected in an extensive framework of international regional and domestic instruments they guarantee people s entitlement to fully and freely utilise their natural resources as a means of subsistence and for economic social and cultural

development yet despite the abundance of natural resources in africa a majority of the people on the continent remain largely impoverished this book articulates the central argument that to achieve the right to development in africa requires appropriate governance of the continent s natural resources to which the people of africa are guaranteed sovereign ownership with case study illustrations from zimbabwe ghana ethiopia and the democratic republic of congo chapters explore the normative measures specific guarantees and community entitlements to natural resources for the realisation of the right to development the book will be an invaluable guide to scholars and postgraduate students of natural resources development and african studies as well as policymakers and practitioners in these areas

Cost-Benefit Studies of Natural Resource Management in Southeast Asia 2015-03-19 the aim of this book is to catalyse global interest in the pursuit of transformational changes in natural resource and environmental management it is shown that transformational policy reforms involve fundamental shifts in strategy with far reaching consequences for the structure of industries the way people behave and the resources they use transformational reforms typically involve a decision to change a suite of institutional arrangements that will result within a short period of time in a paradigm shift and the emergence of an approach that will be recognised as being totally different to the arrangements that were previously in place transformational change is well established in business and can deliver outstanding results in the world of policy development however many transformational policy reforms flounder unlike incremental policy reforms they are often seen to be politically risky and prone to failure using examples of success and failure coupled with insights from practitioners and academics who have succeeded in getting transformational reforms implemented this book presents a set of guidelines for excellence in the pursuit of transformational policy reforms it includes detailed case studies from australia china europe new zealand south east asia and the usa

Gender and Natural Resource Management 2008 this volume brings together international experts in economics sociology and natural resource management to examine the links among property rights collective action and technological change for a variety of technologies across a range of community contexts in the developing world readership undergraduate postgraduate research professional

Gender and Natural Resource Management: Livelihoods, Mobility and Interventions 2013 the links between policy and practice in natural resource management are often depicted as a cyclical and rational process in reality policymaking and implementation are often irrational unpredictable and highly political many science and knowledge based institutions undertake rigorous research with the aim of influencing policy but often their influence is much less than intended understanding who influences policy at different levels and how is crucial to ensure that science is deployed most effectively so as to have an influence on conservation and natural resource management conservation and sustainable development presents a variety of innovative ways that have been used to influence policy processes from community pressure groups through elected and unelected leaders to scientific discourse at the levels of directors of economic planning and conservation this book analyzes experiences from a variety of conservation interventions by the international union for conservation of nature iucn and other agencies primarily in eastern africa and challenges the notion of policymaking as a cyclical process it elaborates on this theme and presents an array of examples of how communities have influenced government through direct lobbying influence of parliamentarians wielding of science and research and inter community dialogue networking and solidarity the authors present a framework for understanding and strategizing such work so that other institutions can identify where they can best add value

Natural Resource Sovereignty and the Right to Development in Africa 2021-08-25 this volume offers an objective view of some of the most critical issues in natural resources written in nontechnical language it uses ideas drawn from economics to look at the issues examine how government laws and policies have caused some of them arise and to find ways in which problems can be lessened originally published in 1982 this is a valuable resource for students interested in environmental studies and public policy

Transformational Change in Environmental and Natural Resource Management 2016 ecological concepts nature of soils soil management man and water water pollution rangelands man and the forest wildlife fresh water fisheries man and the ocean the pesticide problem air pollution noise pollution the soil waste problem poisonous substabces in the human environment the energy crisis nuclear energy radiation and man the human population problem enconomics and the environment the future of planet earth
