this work is a unique collection of valuable statistical information about project apollo it includes a chapter about 20 pages each for apollo 1 through apollo 17 there are several data tables for each mission plus a 50 page section with additional statistics and tables that merge data for each mission so you can easily make comparisons tables include launch and ascent data fuel consumption stage impact locations very detailed mission timelines and much more based on recent research this book discusses physical ergonomics which is concerned with human anatomical anthropometric physiological and biomechanical characteristics as they relate to physical activity topics include working postures materials handling repetitive movements work related musculoskeletal disorders workplace layout safety and health the technological marvel that facilitated the apollo missions to the moon was the on board computer in the 1960s most computers filled an entire room but the spacecraft s computer was required to be compact and low power although people today find it difficult to accept that it was possible to control a spacecraft using such a primitive computer it nevertheless had capabilities that are advanced even by today s standards this is the first book to fully describe the apollo guidance computer s architecture instruction format and programs used by the astronauts as a comprehensive account it will span the disciplines of computer science electrical and aerospace engineering however it will also be accessible to the space enthusiast in short the intention is for this to be the definitive account of the apollo guidance computer frank o brien s interest in the apollo program began as a serious amateur historian about 12 years ago he began performing research and writing essays for the apollo lunar surface journal and the apollo flight journal much of this work centered on his primary interests the apollo guidance computer agc and the lunar module these journals are generally considered the canonical online reference on the flights to the moon he was then asked to assist the curatorial staff in the creation of the cradle of aviation museum on long island new york where he helped prepare the lunar module simulator a lm procedure trainer and an apollo space suit for display he regularly lectures on the apollo computer and related topics to diverse groups from nasa s computer engineering conferences the ieee acm computer festivals and university student groups this book constitutes the refereed proceedings of the third international conference on digital human modeling icdhm 2011 held in orlando fl usa in july 2011 the 58 revised papers presented were carefully reviewed and selected from numerous submissions the papers accepted for presentation thoroughly cover the thematic area of anthropometry applications posture and motion modeling digital human modeling and design cognitive modeling and driver modeling with contributions from an international group of authors with diverse backgrounds this set comprises all fourteen volumes of the proceedings of the 4th ahfe conference 21 25 july 2012 the set presents the latest research on current issues in human factors and ergonomics it draws from an international panel that examines cross cultural differences

design issues usability road and rail transportation aviation modeling and simulation and healthcare this book provides an overview of the origins of the apollo program and descriptions of the ground facilities launch vehicles and spacecraft that were developed in the quest to reach and return from the surface of the moon it will serve as an invaluable single volume sourcebook for space enthusiasts space historians journalists and others the text includes a comprehensive collection of tables listing facts and figures for each mission this title analyzes distributed earth observation missions from different perspectives in particular the issues arising when the payloads are distributed on different satellites are considered from both the theoretical and practical points of view moreover the problems of designing measuring and controlling relative trajectories are thoroughly presented in relation to theory and applicable technologies then the technological challenges to design satellites able to support such missions are tackled an ample and detailed description of missions and studies complements the book subject this book chronicles the experience of the world war ii paratroopers from their earliest days in training to final days of the war spent at berchtesgaden relying heavily on memoirs letters and personal interviews with soldiers this work highlights the rigors of training the spectacle of combat and the relief of survival and victory from d day to bastogne kaufmann follows the american advance across france shedding light on the emotional strain and shock of combat that was until recently often overlooked by generations of americans but freely admitted to by the vets themselves along the way the book details the struggle faced by american g i s as they made their way through france indeed it becomes clear the nazis were not the only obstacle to mutt and joe during the campaign the common problems of supply and relief often exacerbated difficult conditions in the field while incompetent line officers often raised doubt and suspicion among men in the ranks ultimately this is a very personal story about struggle and triumph told by those who endured the hardship of combat interdisciplinary teaching about the earth and environment for a sustainable future presents the outcomes of the integrate project a community effort funded by the national science foundation to improve earth literacy and build a workforce prepared to tackle environmental and resource issues the integrate community is built around the shared goal of supporting interdisciplinary learning about earth across the undergraduate curriculum focusing on the grand challenges facing society and the important role that the geosciences play in addressing these grand challenges the chapters in this book explicitly illustrate the intimate relationship between geoscience and sustainability that is often opaque to students the authors of these chapters are faculty members administrators program directors and researchers from institutions across the country who have collectively envisioned implemented and evaluated effective change in their classrooms programs institutions and beyond this book provides guidance to anyone interested in implementing change on scales ranging from a single course to an entire program by infusing sustainability across the curriculum broadening access to earth and environmental sciences and assessing the impacts of those changes this springerbrief summarizes the development of distributed hash table in both academic and industrial fields it covers the main theory platforms and applications of this key part in distributed systems and applications especially in large scale distributed environments the authors teach the principles of several popular dht platforms that can solve practical problems such as load balance multiple replicas

consistency and latency they also propose dht based applications including multicast anycast distributed file systems search storage content delivery network file sharing and communication these platforms and applications are used in both academic and commercial fields making distributed hash table a valuable resource for researchers and industry professionals a selection of annotated references to unclassified reports and journal articles that were introduced into the nasa scientific and technical information system and announced in scientific and technical aerospace reports star and international aerospace abstracts iaa in today's marketplace there are an array of products that can be purchased and several ways to buy them consumers today are faced with numerous choices when deciding on which products to purchase the choice ultimately comes down to the consumer's specific wants and needs is this the right product for me will i get my money's worth in this product which brand is the best for me what it all comes down to is are consumers doing their homework to determine the best value out there that will fulfill their wants and needs consumer reports buying guide 2007 is an ideal resource for consumers it's a one-stop source for making intelligent money-saving purchases for all home buying needs this compact reference guide contains over 900 brand name ratings along with invaluable information on what products are available important features latest trends and expert advice for home office equipment digital cameras and camcorders home entertainment cellular phones home and yard tools kitchen appliances vacuum cleaners and washing machines reviews of 2007 cars minivans pickups and suvs and so much more from refrigerators to home theater systems consumer reports buying guide 2007 prepares consumers with pertinent information in selecting a suitable product for their needs using this guide will ultimately pay off in valuable product knowledge time saved and perhaps paying a lower price

Scientific and Technical Aerospace Reports 1973 this work is a unique collection of valuable statistical information about project apollo it includes a chapter about 20 pages each for apollo 1 through apollo 17 there are several data tables for each mission plus a 50 page section with additional statistics and tables that merge data for each mission so you can easily make comparisons tables include launch and ascent data fuel consumption stage impact locations very detailed mission timelines and much more

Apollo by the Numbers 2000 based on recent research this book discusses physical ergonomics which is concerned with human anatomical anthropometric physiological and biomechanical characteristics as they relate to physical activity topics include working postures materials handling repetitive movements work related musculoskeletal disorders workplace layout safety and health

Advances in Physical Ergonomics and Safety 2012-07-10 the technological marvel that facilitated the apollo missions to the moon was the on board computer in the 1960s most computers filled an entire room but the spacecraft s computer was required to be compact and low power although people today find it difficult to accept that it was possible to control a spacecraft using such a primitive computer it nevertheless had capabilities that are advanced even by today s standards this is the first book to fully describe the apollo guidance computer s architecture instruction format and programs used by the astronauts as a comprehensive account it will span the disciplines of computer science electrical and aerospace engineering however it will also be accessible to the space enthusiast in short the intention is for this to be the definitive account of the apollo guidance computer frank o brien s interest in the apollo program began as a serious amateur historian about 12 years ago he began performing research and writing essays for the apollo lunar surface journal and the apollo flight journal much of this work centered on his primary interests the apollo guidance computer agc and the lunar module these journals are generally considered the canonical online reference on the flights to the moon he was then asked to assist the curatorial staff in the creation of the cradle of aviation museum on long island new york where he helped prepare the lunar module simulator a lm procedure trainer and an apollo space suit for display he regularly lectures on the apollo computer and related topics to diverse groups from nasa s computer engineering conferences the ieee acm computer festivals and university student groups

The Apollo Guidance Computer 2010-06-25 this book constitutes the refereed proceedings of the third international conference on digital human modeling icdhm 2011 held in orlando fl usa in july 2011 the 58 revised papers presented were carefully reviewed and selected from numerous submissions the papers accepted for presentation thoroughly cover the thematic area of anthropometry applications posture and motion modeling digital human modeling and design cognitive modeling and driver modeling

Digital Human Modeling 2011-06-24 with contributions from an international group of authors with diverse backgrounds this set comprises all fourteen volumes of the proceedings of the 4th ahfe conference 21 25 july 2012 the set presents the latest research on current issues in human factors and ergonomics it draws from an international panel that examines cross cultural differences design issues usability road and rail transportation aviation modeling and simulation and healthcare

Advances in Human Factors and Ergonomics 2012- 14 Volume Set 2012-08-06 this book provides an overview of the origins of the apollo program and descriptions of the ground facilities launch vehicles and spacecraft that were developed in the quest to reach and return from the surface of the moon it will serve as an invaluable single volume sourcebook for space enthusiasts space historians journalists and others the text includes a comprehensive collection of tables listing facts and figures for each mission

Mergent International Manual 2009 this title analyzes distributed earth observation missions from different perspectives in particular the issues arising when the payloads are distributed on different satellites are considered from both the theoretical and practical points of view moreover the problems of designing measuring and controlling relative trajectories are thoroughly presented in relation to theory and applicable technologies then the technological challenges to design satellites able to support such missions are tackled an ample and detailed description of missions and studies complements the book subject

Apollo 2006-03-15 this book chronicles the experience of the world war ii paratroopers from their earliest days in training to final days of the war spent at berchtesgaden relying heavily on memoirs letters and personal interviews with soldiers this work highlights the rigors of training the spectacle of combat and the relief of survival and victory from d day to bastogne kaufmann follows the american advance across france shedding light on the emotional strain and shock of combat that was until recently often overlooked by generations of americans but freely admitted to by the vets themselves along the way the book details the struggle faced by american g i s as they made their way through france indeed it becomes clear the nazis were not the only obstacle to mutt and joe during the campaign the common problems of supply and relief often exacerbated difficult conditions in the field while incompetent line officers often raised doubt and suspicion among men in the ranks ultimately this is a very personal story about struggle and triumph told by those who endured the hardship of combat

Unity: The Art and Science of Transformational Change 2000 interdisciplinary teaching about the earth and environment for a sustainable future presents the outcomes of the integrate project a community effort funded by the national science foundation to improve earth literacy and build a workforce prepared to tackle environmental and resource issues the integrate community is built around the shared goal of supporting interdisciplinary learning about earth across the undergraduate curriculum focusing on the grand challenges facing society and the important role that the geosciences play in addressing these grand challenges the chapters in this book explicitly illustrate the intimate relationship between geoscience and sustainability that is often opaque to students the authors of these chapters are faculty members administrators program directors and researchers from institutions across the country who have collectively envisioned implemented and evaluated effective change in their classrooms programs institutions and beyond this book provides guidance to anyone interested in implementing change on scales ranging from a single course to an entire program by infusing sustainability across the curriculum broadening access to earth and environmental sciences and assessing the impacts of those changes

NASA SP. 1984 this springerbrief summarizes the development of distributed hash table in both academic and

industrial fields it covers the main theory platforms and applications of this key part in distributed systems and applications especially in large scale distributed environments the authors teach the principles of several popular dht platforms that can solve practical problems such as load balance multiple replicas consistency and latency they also propose dht based applications including multicast anycast distributed file systems search storage content delivery network file sharing and communication these platforms and applications are used in both academic and commercial fields making distributed hash table a valuable resource for researchers and industry professionals

International Aerospace Abstracts 1967 a selection of annotated references to unclassified reports and journal articles that were introduced into the nasa scientific and technical information system and announced in scientific and technical aerospace reports star and international aerospace abstracts iaa

Research and Technology Program Digest Flash Index 2012-09-13 in today's marketplace there are an array of products that can be purchased and several ways to buy them consumers today are faced with numerous choices when deciding on which products to purchase the choice ultimately comes down to the consumer's specific wants and needs is this the right product for me will i get my money's worth in this product which brand is the best for me what it all comes down to is are consumers doing their homework to determine the best value out there that will fulfill their wants and needs consumer reports buying guide 2007 is an ideal resource for consumers it's a one-stop source for making intelligent money-saving purchases for all home buying needs this compact reference guide contains over 900 brand name ratings along with invaluable information on what products are available important features latest trends and expert advice for home office equipment digital cameras and camcorders home entertainment cellular phones home and yard tools kitchen appliances vacuum cleaners and washing machines reviews of 2007 cars minivans pickups and SUVs and so much more from refrigerators to home theater systems consumer reports buying guide 2007 prepares consumers with pertinent information in selecting a suitable product for their needs using this guide will ultimately pay off in valuable product knowledge time saved and perhaps paying a lower price
