one of the most common complaints parents hear is that their child has great potential but is lazy in the workplace one hears that a colleague is brilliant but just can t seem to deliver on time dr levine believes that in reality very few people are truly lazy nearly all lazy children and unproductive adults are in fact suffering from some sort of output failure that is some problem of the mind that inhibits their productivity despite their good

intentions in this book dr levine draws heavily on his years of clinical experience to construct the stories of representative children and adults who failed to be productive for the most common reasons too often we focus only on failure but people benefit enormously from recognition of their successes in explaining outside or environmental factors that can affect productivity dr levine points to the role of parents as well as teachers in identifying a child s weaknesses and nurturing the capacity to deliver with such practical suggestions as describing the ideal study environment for a child whether the problem is manifested in motor breakdown memory shortfall verbal problems lack of mental energy or underlying disorganization dr levine provides a workable solution and dismisses the lazy label
