Achievements, durativity and scales 2015-09-30 this book contributes to the growing work on scale based formal semantic approaches to verbal phenomena it presents a new scale based framework for both aspectual classes and grammatical aspect with the aim of offering an analysis of achievements in the progressive in order to analyse these the temporal trace function is relativised to a granularity parameter and the semantics of the progressive operator is assumed to involve partitivity over scales of change to this end a novel concept of a scale of change is adopted building on a bottom up idea of associating scales with events and characterising verbal predicates via event level scales as a crucial departure from former scale based approaches predicates like arrive are associated with both two valued and multi valued scales of change the new framework can then capture fine grained aspectual class differences and predict the interpretations of the progressive for different aspectual classes

"Achievements and Challenges" 1969 the three forces of democratization decentralization and development have swept the world over the last decade and redrawn the maps of politics power and prosperity modern mexico has been fully engaged in the trio making it a rich case study in recent years enhanced political competition has redistributed decisionmaking across all levels of government making the government more accountable to the average citizen it has also given subnational governments a renewed role as economic agents the taxation spending borrowing and institutions of mexican states and municipalities are now increasingly under the rigor of market discipline the combined closer scrutiny of voters and financiers is creating a new incentive framework for policymakers a framework where necessary reforms become both inescapable and more importantly a perceived source of potential reward this book is the product of the analytical work of a large number of experts mexican and foreign in the book the

experts document Mexico's decentralization experience, conceptualize its main trends, policies, and options, and bring it into the light of international comparison. They distill critical lessons and challenges that are of relevance for Mexico, for Latin America, and generally for countries that are embarking on far-reaching decentralization efforts. This renders the volume a major contribution to our knowledge and thinking in this area and a timely one since decentralization is an irreversible process that is likely to continue occupying policymakers for years to come.

The development of pesticide resistance in arthropod pests, plant pathogens, and weeds can be viewed and studied from two contrasting perspectives at a fundamental level. Resistance provides an almost ideal example of adaptation to withstand severe environmental stress. Population geneticists, biochemists, and most recently molecular biologists have cast considerable light on the nature of this adaptation in diverse taxonomic groups and on factors determining its selection and spread within and between populations. Unlike most evolutionary phenomena, however, resistance is also of immediate practical and economic significance. Not only has the number of resistant species continued to increase inexorably, but there has been an alarming increase in the severity and extent of some resistance problems. Cases of organisms resisting virtually all available pesticides are by no means uncommon and pose a formidable challenge in view of present difficulties in discovering and developing novel chemicals. Although most occurrences of resistance were initially monofactorial, resistance now frequently involves a suite of coexisting mechanisms that protect organisms against the same or different pesticide groups and may even predispose them to resist new, as yet unused chemicals.

Resistance' 91: Achievements and Developments in Combating Pesticide

Resistance 2010-01-01 micro entrepreneurial activities play a pivotal role in rural economic development in the third world countries as a result in bangladesh poverty alleviation through rural centric micro entrepreneurship development has been focused for more than thirty five years over 600 registered and thousands unregistered microcredit organizations including globally prominent institutions like grameen bank brac asa bard actionaid care etc are operating here with their own reputed models however the micro entrepreneurship development and its achievements in the country are still lagging behind a satisfactory level due to a number of prevailing factors this book examines its major achievements and shortcomings from the perspectives of the structured institutions non structured institutions and non institutional factors and government s policy guidelines influencing development of micro entrepreneurship and makes recommendations for overcoming the shortcomings

Microentrepreneurship Development in Bangladesh: Achievements and

Shortcomings 2015 gwen bradford presents a systematic account of what

achievements are and why they are worth the effort she argues that more things
count as achievements than we might have thought and offers a new perfectionist
theory of value in which difficulty perhaps surprisingly plays a central part in
characterizing achievements

2021-06-17 tracing the deep connections between philosophy and education ryan
mcinerney argues that we must use philosophy to reflect on the significance of

educational practice to all human endeavour he uses a broad approach which takes in the relationships governing philosophy education and language to reveal education's fundamental achievements and metaphysical significance the realization of educational ideals and policies are read alongside growing skepticism regarding the theoretical and practical significance of philosophical thinking and the emphasis on resource efficiency and measurable outcomes which characterise schooling today it is from this context that mcinerney defends the value inherent to the philosophy of education drawing upon contemporary continental and analytic thinkers including nietzsche gadamer and wittgenstein mcinerney charts the role of education in shaping the child's metaphysical transformation through language acquisition connecting early years and primary school education mcinerney pinpoints rationality as the crucial factor which produces critical thinking beings he presents the pursuit of philosophically minded education as a rational pursuit which enables us to philosophise and educate others in turn dispensing with the epistemological and conceptual foundationalisms of the past

The Heroes of the War for the Union and Their Achievements 1969 achievement
assessment has undergone a major shift from what some call a culture of testing
to a culture of assessment nowadays a strong emphasis is placed on the
integration of assessment and instruction on assessing processes rather than just
products and on evaluating individual progress relative to each student s starting
point this book addresses assessment issues in light of the present state of affairs
the first part discusses new alternatives in the assessment of achievement in
various subject areas focusing on agenda practice impact and evaluation of the
assessment the second part deals with issues related to assessment of the
learning process specifically questions concerning the assessment of individual
differences in prior knowledge learning skills and strategies
