this collection of essays highlights the thorny and divisive issue of the admission of women into the sacramental diaconal priesthood of the christian church from the orthodox theological perspective the contributions here stem from scientific papers presented at an international conference titled deaconesses ordination of women and orthodox theology organized in thessaloniki

greece in 2015 by the center of ecumenical missiological and environmental studies comes they cover almost all the fields of biblical liturgical patristic systematic canonical and historical theology the volume's main focus is the ancient order of deaconesses in connection with the overall issue of the ordination of women although most papers address the issues from an orthodox perspective their sober analysis can provide theological argumentation for the wider christian community both the churches and christian denominations that exclude women from the sacramental priesthood and those that have already adopted their ordination
