this book offers a new account of the connections between seventeenth century english history and the history of the rest of the world eschewing nationalist narratives it demonstrates how greater engagement with the world beyond europe shaped signature aspects of the english experience early modern trading corporations are the central actors in the story global trade and the shaping of english freedom offers a profoundly altered reading of the practices of these entities the companies were not monolithic entities pursuing narrow nationalist interests overseas nor were they inefficient monopolies

doomed to commercial failure in the seventeenth century as this book shows they were driven and transformed by the immediate and local interests of company agents and their foreign networks because the trading companies were the most important bridge between international contexts and english legal and political debates they connect non european power and preference to those debates these unappreciated actors within the corporate sphere play leading roles in this book as the shapers of english debate about the meaning of english freedom and the futures of the trades they participated in overseas the book offers a new perspective on the foreign actors who shaped english commercial and legal ideas and practices in the seventeenth century as well as the ottoman bantenese huedan siamese and mughal contributions to the ideological institutional and procedural underpinnings that would develop slowly but surely into the british empire
