

# Free read Integrated forest fire management in namibia Full PDF

africa is a fire continent since the early evolution of humanity fire has been harnessed as a land use tool many ecosystems of sub sahara africa that have been shaped by fire over millennia provide a high carrying capacity for human populations introduction increasing conflagrations of forests and other lands throughout the world during the 1980s and 1990s have made fires in forest and other vegetation emerge as an important global concern both the number and severity of wildfires accidental fires and the application of fire for land use change seem to have increased dramatically compared to previous decades of the twentieth century the adverse consequences of extensive wildfires cross national boundaries and have global impacts fire regimes are changing with climate variability and population dynamics satellite remote sensing technology has the potential to play an important role for monitoring fires and their consequences as well as in operational fire management in response to this need as well as to respond to other needs for more rapid progress in forest observation in 1997 the committee on earth observation satellites ceos initiated global observation of forest cover gofc as an international pilot project to test the concepts of an integrated global observing system the gofc program is currently part of the global terrestrial observing system gtos gofc was designed to bring together data providers and information users to make information products from satellite and in situ observations of forests more readily available worldwide fire monitoring and mapping was formed as one of three basic components of gofc this book contains eighteen contributions authored by scientists who represent the most active international research and development institutions aiming at coordinating and improving international efforts for user oriented systems and products these papers were initially presented at a gofc fire workshop held at the joint research centre ispra the volume is a contribution of the gofc forest fire monitoring and mapping implementation team to the interagency task force working group wildland fire of the un international strategy for disaster reduction isdr the designations employed and the presentation of material in this information product do not imply the expression of any opinion whatsoever on the part of the food and agriculture organization of the united nations fao concerning the legal or development status of any country territory city or area or of its authorities or concerning the delimitation of its frontiers or boundaries the mention of specific companies or products of manufacturers whether or not these have been patented does not imply that these have been endorsed or recommended by fao in preference to others of a similar nature that are not mentioned pub desc a combination of broad disciplinary coverage and scientific excellence the encyclopedia of forest sciences will be an indispensable addition to the library of anyone interested in forests forestry and forest sciences packed with valuable insights from experts all over the world this remarkable set not only summarizes recent advances in forest science techniques but also thoroughly covers the basic information vital to comprehensive understanding of the important elements of forestry the encyclopedia of forest sciences also covers relevant biology and ecology different types of forestry e g tropical forestry and dryland forestry scientific names of trees and shrubs and the applied economic and social aspects of forest management valuable key features further enhance the utility of this encyclopedia as an exceptional reference tool also available online via sciencedirect featuring extensive browsing searching and internal cross referencing between articles in the work plus dynamic linking to journal articles and abstract databases making navigation flexible and easy for more information pricing options and availability visit info sciencedirect com edited and written by a distinguished group of editors and contributors well organized encyclopedic format provides concise readable entries easy searches and thorough cross references illustrative tables figures and photographs in every entry produced in full color comprehensive glossary defines new and important terms complete up to date coverage of over 60 areas of forest sciences sure to be of interest to scientists students and professionals alike editor in chief is the past president of the international union of forestry research organizations the oldest international collaborative forestry research organization with over 15 000 scientists from 100 countries originally published in 1987 this thesaurus is concerned with the spoken languages of africa languages are grouped into a relatively large number of sets and subsets within which the relationship of languages to one another is locally apparent and uncontroversial the volume presents the languages in classified order with notes on each language their variant names and immediate classification and reference to the sources consulted one section offers an exhaustive list of

the languages spoken as home languages by local communities in each state together with details of languages widely used for inter group communication given official recognition or used in education or the media there are brief phonological analyses of a broad sample of some 20 african languages and a comprehensive bibliography and language index to the whole work
