Law without Justice 2005-12-01 if an innocent person is sent to prison or if a killer walks free we are outraged the legal system assures us and we expect and demand that it will seek to do justice in criminal cases so why for some cases does the criminal law deliberately and routinely sacrifice justice in this unflinching look at american criminal law paul robinson and michael cahill demonstrate that cases with unjust outcomes are not always irregular or unpredictable rather the criminal law sometimes chooses not to give defendants what they deserve that is unsatisfying results occur even when the system works as it is designed to work the authors find that while some justice sacrificing doctrines serve their intended purpose many others do not or could be replaced by other better rules that would serve the purpose without abandoning a just result with a panoramic view of the overlapping and often competing goals that our legal institutions must balance on a daily basis law without justice challenges us to restore justice to the criminal justice system

Making the Modern Criminal Law 2016-01-21 the criminalization series arose from an interdisciplinary investigation into criminalization focussing on the principles that might guide decisions about what kinds of conduct should be criminalized and the forms that criminalization should take developing a normative theory of criminalization the series tackles the key questions at the heart of the issue what principles and goals should guide legislators in deciding what to criminalize how should criminal wrongs be classified and differentiated how should law enforcement officials apply the law s specifications of offences this the fifth book in the series offers a historical and conceptual account of the development of the modern criminal law in england and as it has spread to common law jurisdictions around the world the book offers a historical perspective on the development of theories of criminalization it shows how the emergence of theories of criminalization is inextricably linked to modern understandings of the criminal law as a conceptually distinct body of rules and how this in turn has been shaped by the changing functions of criminal law as an instrument of government in the modern state the book is structured in two main parts the first traces the development of the modern law as a distinct and conceptually distinct body of rules looking in particular at ideas of jurisdiction codification and responsibility the second part then engages in detailed analysis of specific areas of criminal law focusing on patterns of criminalization in relation to property the person and sexual conduct

Principles of the Criminal Law 2015-06-14 probably the best modern history of a particular branch of english law when it

appeared in 1883 it was probably the best modern history of a particular branch of english law that had yet appeared in england it won high praise from pollock and maitland english criminal law they said will be fortunate in its historians for it will fall into the hands of matthew hale and fitzjames stephen though the more intensive study of the earlier history of our law has rendered some parts of it obsolete it is still the best history of the later stages of the law and it has another merit which it can never lose the fact that its author was a practising lawyer and a judge gives to his account of many parts of the law and especially to his analysis of famous trials the reality and vividness which comes of practical experience william s holdsworth the historians of anglo american law 78 sir james fitzjames stephen 1829 1894 was a distinguished and influential lawyer judge writer and law reformer when he was the legal member of the imperial legislative council in india he drafted twelve acts and eight other enactments most of these such as the indian evidence act are in force today his 1878 digest of criminal law a codification though never adopted in great britain was the basis of the criminal codes of canada new zealand and several colonies of australia also a philosopher he was a leading critic of john stuart mill xii 499 pp **Crime, Reason and History** 2001 this volume presents a comparative examination of the issue of fault in criminal law extant law reveals significant problems in adoption of consistent approaches to doctrinal and theoretical underpinnings of fault liability and culpability thresholds in criminal law this has been exemplified by a plethora of recent jurisprudential authorities revealing varying degrees of confusion and vacillation this collection focuses on fault liability for inculcation with contributions from leading specialists from different jurisdictions presenting alternative perspectives the book addresses three specific elements within the arena of fault embracing an overarching synergy between them this structure facilitates an examination of uk provisions with specialist contributions on domestic law and in contrasting these provisions against alternative domestic jurisdictions as well as comparative contributions addressing a particularised research grid for content the comparative chapters provide a wider background of how other legal systems treat a variety of specialised issues relating to fault elements in the context of the criminal law with contributions from leading experts in the field the book will be an invaluable resource for researchers academics and practitioners working in this area

Criminal Theory and International Human Rights Law 2021-04 german criminal law doctrine as one of the more influential ones over time and on a global scale takes rather different approaches to many of the problems of substantive law from those of the common law family of countries like the uk the us canada new zealand australia etc it also differs markedly from the system which is most often used in anglophone writing as a civil law comparison the french law german criminal law is a code based model and has been for centuries the influence of academic writing on its development has been far greater than in the judge oriented common law models the book will serve as a useful aid to debates about codification efforts in countries that are mostly based on a case law system but who wish to re structure their law in one or several criminal codes the comparison will show that similar problems occur in all legal systems regardless of their provenance and the attempts of individual systems at solving them their successes and their failures can provide a rich experience on which other countries can draw and on which they can build the book provides an outline of the principles of german criminal law mainly the so called general part eg actus reus mens rea defences participation and the core offence categories homicide offences against property sexual offences it sets out the principles their development under the influence of academic writing and judicial decisions the book is not meant as a textbook of german criminal law but is a selection of interrelated in depth essays on the central problems wherever it is apposite and feasible comparison is offered to the approaches of english criminal law and the legal systems of other common and civil law countries in order to allow common lawyers to draw the pertinent parallels to their own jurisdictions

criminal law the contributors then turn their attention to the role of the state its institutions and officials and their role not only as creators enactors interpreters and enforcers of the criminal law but also as subjects of it how can the agents of the criminal law also be answerable to it finally discussion turns to how the criminal law can be constituted as part of an international order examining the relationships between domestic laws of different nation states and between domestic criminal law and international or transnational law the chapters also look at the authority and jurisdiction of international criminal law itself and its relationship to other dimensions of the international order a vital examination of one of the most important topics in modern criminal legal theory this volume raises new questions central to the study of the criminal law and offers new suggestions for addressing them

Principles of the Criminal Law 2015-08-22 excerpt from outlines of criminal law in preparing the book i have aimed at making its range of topics no wider than may be grasped upon a first perusal even by a reader previously unfamiliar with law but i have tried to treat each individual topic with such fulness as may serve to fix it effectually in the reader s memory yet the susceptibility of his memory must depend very much as all lecturers soon discover upon the extent to which the matter in hand arouses his interest fortunately the law of crime when once the pre liminary difficulties attendant upon the chaotic form which it still retains in england have been faced and surmounted is a branch of jurisprudence peculiarly capable of being rendered interesting it is closely linked with history with ethics with politics with philanthropy my endeavour has been to make it attractive to the reader by supplying him with enough illustrative examples to give vividness and reality to all the abstract principles of our criminal law and also by tracing out its connexion with the past sufficiently to explain the various historical anomalies with which it is still encumbered and about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Reconstructing the Criminal 1990 national borders are permeable to all types of illicit action and contraband goods whether it is trafficking humans body parts digital information drugs weapons or money whilst criminals exist in a borderless world where territorial boundaries allow them to manipulate different markets in illicit goods the authorities who pursue them can remain constrained inside their own jurisdictions in a new edition of his ground breaking work boister examines how states must cooperate to tackle some of the greatest security threats in this century so far analyses to what extent vested interests have determined the course of global policy and law enforcement and illustrates how responding to transnational crime itself becomes a form of international relations which reorders global political power and becomes at least in part an end in itself arguing that transnational criminal law is currently geared towards suppressing criminal activity but is not as committed to ensuring justice boister suggests that it might be more strongly influenced by individual moral panics and a desire for criminal retribution than an interest in ensuring a proportional response to offences protection of human rights and the preservation of the rule of law
