Savaging the Civilized 1999-04 the us led coalition which launched an invasion of iraq on 20 march 2003 led to a decade long military presence in the country in the run up to that invasion many comparisons were made with the 1991 gulf war ahmed ijaz malik takes these two instances of military intervention by republican us governments to highlight how the official discourse of leaders and decision makers has an impact on foreign policy and its results by taking these two examples he examines how discourse affects real events and the extent to which the legacy of the cold war has influenced the decisions which are made at the upper echelons of the us government us foreign policy and the gulf wars critically analyses the post cold war liberal cosmopolitan and realist discourses related to these two instances of us military intervention using an approach which malik labels critical realism this book examines the ways in which discourses often act as ideological covers for

material interests whilst still not holding a deterministic view whereby these interests alone shape policies from this perspective this book assesses the themes of just war humanitarianism and cosmopolitanism it furthermore uses the approach of critical realism to engage with a variety of arguments on the emerging role of the us as they were displayed in academic discourses and other intellectual contributions around each of the 1991 and 2003 wars malik relates these discussions to an analysis of the official discourses documents and policies displayed prior to the 1991 and 2003 wars as well as to an examination of the resulting actual conduct since the implications of the us military presence in the middle east are so central to the study of international relations and security studies this book will be invaluable for specialists in these disciplines as well as for those interested in policy formation and the wider middle east

The Civilized Organization 2002-01-01 by the mid nineteenth century britain celebrated its possession of a unique empire of liberty that propagated the rule of private property free trade and free labor across the globe the british also knew that their empire had been built by conquering overseas territories trading slaves and extorting tribute from other societies set in the context of the early modern british empire colonial capitalism and the dilemmas of liberalism paints a striking picture of these tensions between the illiberal origins of capitalism and its liberal imaginations in metropolitan thought onur ulas ince combines an analysis of political economy and political theory to examine the impact of colonial economic relations on the development of liberal thought in britain he shows how a liberal self image for the british empire was constructed in the face of the systematic expropriation exploitation and servitude that built its transoceanic capitalist economy the resilience of britain s self image was due in large part to the liberal intellectuals of empire such as john locke edmund burke and edward gibbon wakefield and their efforts to disavow the violent transformations that propelled british colonial capitalism ince forcefully demonstrates that liberalism as a language of politics was elaborated in and through the political economic debates around the contested meanings of private property market exchange and free labor weaving together intellectual history critical theory and colonial studies this book is a bold attempt to reconceptualize the historical relationship between capitalism liberalism and empire in a way that continues to resonate with our present moment New Mentalities of Government in China 2016-01-13 john guincy adams warned americans not to search abroad for monsters to destroy yet such figures have frequently habituated the discourses of u s foreign policy this collection of essays focuses on counter identities in american consciousness to explain how foreign policies and the discourse surrounding them develop whether it is the seemingly ubiquitous evil of hitler during world war ii or the more complicated perceptions of communism throughout the cold war these essays illuminate the cultural contexts that constructed rival identities the authors challenge our understanding of others looking at early applications of the concept in the eighteenth century to recent twenty first century conflicts establishing how this phenomenon is central to decision making through centuries of conflict

<u>Gaillard's Medical Journal and the American Medical Weekly</u> 1881 mustafa kemal atatürk was not widely known when he led the national resistance movement in anatolia in 1919 however the effort and attention that his government devoted to the creation of his public image gradually turned him into a superhuman figure in the eyes of many film played a crucial role in the creation and dissemination of this image and helped atatürk to advance his project of building a new imagined community of the turkish nation but despite the impact of film and film making on the political and cultural life of early republican turkey there is almost no research that has analysed this footage atatürk on screen uncovers various film archives to reveal the significant albeit paradoxical role of film during this period enis dinç shows that while film making was crucial for the creation of atatürk s public image and the presentation of turkey s new modern image to the world it also posed risks as it could be re used re edited and re framed for the purposes of counter propaganda the main analysis in the book is of the film footage itself including rare contemporary cinematic sources which have never received comprehensive analysis before the book also makes use of other primary sources such as letters memoirs newspapers reports newsletters and production files providing readers with a multi layered account of the period

The Eclectic Elementary Geography 1896 though best known as an adventurer who entered mecca in disguise and sought the source of the white nile richard burton contributed so forcefully to his generation that he provides us with a singularly panoramic perspective of the victorian world this book is an important contribution to our understanding of a remarkable man and a crucial era Colonial Capitalism and the Dilemmas of Liberalism 2018-03-16 this book considers the shifts in aesthetic representation over the period 1885 1930 that coincide both with the rise of literary modernism and imperialism s high point if it is no coincidence that the rise of the novel accompanied the expansion of empire in the eighteenth century then the historical conditions of fiction as the empire waned are equally pertinent peter childs argues that modernist literary writing should be read in terms of its response and relationship to events overseas and that it should be seen as moving towards an emergent post colonialism instead of struggling with a residual colonial past beginning by offering an analysis of the generational and gender conflict that spans art and empire in the period childs moves on to examine modernism s expression of a crisis of belief in relation to subjectivity space and time finally he investigates the war as a turning point in both colonial relations and aesthetic experimentation each of the core chapters focuses on one key writer and discuss a range of others including conrad lawrence kipling eliot woolf joyce conan doyle and haggard
