Medical Image Computing and Computer-Assisted Intervention - MICCAI 2008 2008-10-30

the 11th international conference on medical imaging and computer assisted intervention miccai 2008 was held at the helen and martin kimmel center of new york university new york city usa on september 6 10 2008 miccai is the premier international conference in this domain with depth papers on the multidisciplinary fields of biomedical image computing and analysis computer assisted intervention and medical robotics the conference brings together biological scientists clinicians computer scientists engineers mathematicians physicists and other interested researchers and offers them a forum to exchange ideas in these exciting and rapidly growing fields the conference is both very selective and very attractive this year we received a record number of 700 submissions from 34 countries and 6 continents from which 258 papers were selected for publication which corresponds to a success rate of approximately 36 some interesting facts about the distribution of submitted and accepted papers are shown graphically at the end of this preface the paper selection process this year was based on the following procedure which included the introduction of several novelties over previous years 1 a program committee pc of 49 members was recruited by the program chairs to get the necessary body of expertise and geographical coverage all pc members agreed in advance to participate in the national paper selection process 2 key words grouped in 7 categories were used to describe the content of the submissions and the expertise of the reviewers

Artificial Intelligence for Medicine 2024-03-14

artificial intelligence for medicine an applied reference for methods and applications introduces readers to the methodology and ai/ml algorithms as well as cutting edge applications to medicine such as cancer precision medicine critical care personalized medicine telemedicine drug discovery molecular characterization and patient mental health research in medicine and tailored clinical treatment are being quickly transformed by artificial intelligence ai and machine learning ml the content in this book is tailored to the reader's needs in terms of both type and fundamentals it covers the current ethical issues and potential developments in this field artificial intelligence for medicine is beneficial for academics professionals in the it industry educators students and anyone else involved in the use and development of ai in the medical field covers the basic concepts of artificial intelligence and machine learning methods and practices and advanced topics and applications to clinical and precision medicine presents readers with an understanding of how ai is revolutionizing medicine by demonstrating the applications of computational intelligence to the field along with an awareness of how ai can improve upon traditional medical structures provides researchers practitioners and project stakeholders with a complete guide for applying ai techniques in their projects and solutions

Intracranial Pressure and Brain Monitoring XV 2016-05-10

this volume showcases recent high quality work relating to the pathophysiology biophysics monitoring and treatment of traumatic brain injury and hydrocephalus that was presented at the 15th international symposium on intracranial pressure and brain monitoring icp held in singapore in november 2013 the included papers derive from experts in neurointensive care physiology physics engineering and neurosurgery who have made important contributions in this translational area of research all were selected from among oral and oral poster presentations following a rigorous peer review process involving the icp board members and their focus ranges from the latest research findings and developments to clinical trials and experimental studies this collection of papers from icp 2013 continues the proud tradition of publishing key work from the icp symposia and will be of interest for all who wish to stay abreast of recent advances in the field

Innovation 2005

one issue each year consists of an annual conference review
