Defense utilization and disposal manual

1982

buying defense weapon systems under multiyear contracts rather than a series of single year contracts can save costs because contractors can buy materials in more economic quantities schedule workers and facilities more efficiently and reduce the burden of preparing multiple proposals the u s air force is in the process of awarding multiyear contracts for 60 f 22a aircraft over three years congress wants to assure itself that the proposed contract will yield the promised savings and asked rand for an independent review of the estimated savings researchers found that a multiyear procurement of three lots of f 22a fighters would save an estimated 411 million about 4 5 percent of the total contract value they were able to trace 70 percent of the 411 million to substantiated savings estimates identified by the contractors examining the issue of multiyear savings using several approaches produces a consistent range of results indicating that the savings attributed to the multiyear contract by the contractors appear to be reasonable

phantom ii was quickly adopted by the usaf after its spectacular us navy introduction its introduction to usaf squadrons happened just in time for the vietnam conflict where usaf f 4cs took over mig fighting duties from the f 100 super sabre although the f 4 was never intended as a dog fighter to tangle with light nimble gun armed migs it was responsible for destroying 109 migs in aerial combat at the end of their careers many of the survivors from the 3 380 land based phantoms were converted into target drones for training purposes new aircraft were also built for west germany iran and israel the usaf s experience with the phantom showed clearly that the air to air fighter was still a necessity and its decision to fund its successor the mcdonnell douglas f 15 eagle as well as the f 16 fighting falcon and f 22a raptor was heavily influenced by the lessons of us and other phantom pilots in combat

canvas aircraft typical of world war i through the technological advances during and after world war ii to modern fifth generation complex aircraft like the f 35 lightning ii even before its formation sir richard williams the father of the raaf had decided to employ an alpha numeric numbering system to identify and account for each aircraft in service this system started with a1 a2 a3 etc as each type of aircraft came into service each individual aircraft within each series was identified as a1 1 a1 2 and so on and the aircraft serial became known colloquially as the a number with some exceptions over the century since the a number system started aircraft entered raaf service in broadly the sequence of the a numbers and so this book is intended to assist in charting the 100 year history of the raaf by listing aircraft operated in a number sequence rather than by listing them by role such as fighter bomber maritime trainer transport etc or alphabetically by name or by manufacturer the inclusion of a comprehensive index and the quick reference guide to aircraft by role is intended to facilitate the location of the entry for any specific type of aircraft for those who may not already know its a number aircraft of the royal australian air force is a must have for all those who have served in the raaf those with a passion for military aviation and aircraft in general and the broader members of the public wishing to gain an appreciation of the royal australian air force in its centenary year
