death is something we all confront it touches our families our homes
our hearts and yet we have grown used to denying its existence
treating it as an enemy to be beaten back with medical advances we are
living at a unique point in human history people are living longer
than ever yet the longer we live the more taboo and alien our
mortality becomes yet we and our loved ones still remain mortal people
today still struggle with this fact as we have done throughout our
entire history what led us to this point what drove

death and make it foreign and unfamiliar schillace shows how talking about death and the rituals associated with it can help provide answers it also brings us closer together conversation and community are just as important for living as for dying some of the stories are strikingly unfamiliar others are far more familiar than you might suppose but all reveal much about the present and about ourselves

an absolutely magnificent book the new republic the fruit of almost two decades of study that traces the changes in western attitudes toward death and dying from the earliest christian times to the present day a truly landmark study the hour of our death reveals a pattern of gradually developing evolutionary stages in our perceptions of life in relation to death each stage representing a virtual redefinition of human nature starting at the very foundations of western culture the eminent historian phillipe ariès shows how from graeco roman times through the first ten centuries of the common era death was too common to be frightening each life was quietly subordinated to the community which paid its respects and then moved on ariès identifies the first major shift in attitude with the turn of the eleventh century when a sense of individuality began to rise and with it profound consequences death no longer meant merely the weakening of community but rather the destruction of self hence the growing fear of the afterlife new conceptions of the last judgment and

the first attempts by masses and other rituals to guarantee a better life in the next world in the 1500s attention shifted from the demise of the self to that of the loved one as family supplants community and by the nineteenth century death comes to be viewed as simply a staging post toward reunion in the hereafter finally ariès shows why death has become such an unendurable truth in our own century how it has been nearly banished from our daily lives and points out what may be done to re tame this secret terror the richness of ariès s source material and investigative work is breathtaking while exploring everything from churches religious rituals and graveyards with their often macabre headstones and monuments to wills and testaments love letters literature paintings diaries town plans crime and sanitation reports and grave robbing complaints aries ranges across europe to russia on the one hand and to england and america on the other as he sorts out the tangled mysteries of our accumulated terrors and beliefs we come to understand the history indeed the pathology of our intellectual and psychological tensions in the face of death
