When it comes to delivering product design innovations to mobile device users, Nokia is the yardstick by which all others are judged. Now the process and working methods that have enabled Nokia to revolutionize usability are fully explained for the first time in this beautiful four-color book written with insight by two veterans of Nokia's design triumphs. Co-author Christian Lindholm was featured in the August 2002 issue of Business 2.0 magazine. This one-of-a-kind reference vividly delivers the complete design process from concept creation to product testing. The future of small interfaces, usability engineering in practice in the mobile environment, the elements of a Nokia user interface, first-person accounts of the product development cycle, learn the processes that helped Nokia develop the world's most desirable handheld.

Over the past few years, software radio has transitioned from an esoteric academic idea to a rapidly commercializing technology that in the coming decade will revolutionize the mobile telecommunications marketplace. Written for industry professionals in engineering and commercial roles as well as those in academia and research, this book will provide a comprehensive context for all those already active in or entering the field. Walter Tuttlebee himself, a pioneer of software radio in Europe, has gathered contributions from many of the acknowledged world experts in software radio, leaders operating at the heart of the software radio world today who share their experience and insight into the background, the present, and the future evolution of the technology and the industry contributions from North America, Europe, and Asia ensure a comprehensive overview of the global SDR scene. The structured approach ensures that the book comprehensively addresses the key issues in the title: the origins of software radio, what has been and is driving its commercialization, and what is happening on the international scene. The book includes a comprehensive review of the origins of software radio in the defense industry, an insider's view of the origins, evolution, role, and activities of the SDR Forum, a summary of the MIT Sloan study into the drivers of global success in the mobile wireless marketplace, a review of end-user and mobile network operator perspectives of software radio, and what the value it can offer. Insiders' summaries of recent SDR research activities in Europe and Japan, coverage of the regulatory issues associated with SDR and the current approaches being taken in North America and Europe with contributions from the regulators themselves, a description of the first steps to SDR standards, the ETSI MEXE standard, descriptions of some of the first commercial software-defined radio products for both defense and commercial applications, endorsed with a foreword from Joseph Mitola III, the father of software radio.
