for many archaeologists iberia is the last great unknown region in europe although it occupies a crucial position between south western europe and north africa academic attention has traditionally been focused on areas like greece or italy however iberia has an equally rich

cultural heritage and archaeological tradition this ground breaking volume presents a sample of the ways in which archaeologists have applied theoretical frameworks to the interpretation of archaeological evidence offering new insights into the archaeology of both iberia and europe from prehistoric time through to the tenth century the contributors to this book are leading archaeologists drawn from both countries they offer innovative and challenging models for the paleolithic neolithic copper age bronze age iron age roman early medieval and islamic periods a diverse range of subjects are covered including urban transformation the iron age peoples of spain observations on historiography and the origins of the arab domains of al andalus it is essential reading for advanced undergraduates and those researching the archaeology of the iberian peninsula

the boreal forest is the northern most woodland biome whose natural history is rooted in the influence of low temperature and high latitude alaska s boreal forest is now warming as rapidly as the rest of earth providing an unprecedented look at how this cold adapted fire prone forest adjusts to change this volume synthesizes current understanding of the ecology of

alaska s boreal forests and describes their unique features in the context of circumpolar and global patterns it tells how fire and climate contributed to the biome s current dynamics as climate warms and permafrost permanently frozen ground thaws the boreal forest may be on the cusp of a major change in state the editors have gathered a remarkable set of contributors to discuss this swift environmental and biotic transformation their chapters cover the properties of the forest the changes it is undergoing and the challenges these alterations present to boreal forest managers in the first section the reader can absorb the geographic and historical context for understanding the boreal forest the book then delves into the dynamics of plant and animal communities inhabiting this forest and the biogeochemical processes that link these organisms in the last section the authors explore landscape phenomena that operate at larger temporal and spatial scales and integrates the processes described in earlier sections much of the research on which this book is based results from the bonanza creek long term ecological research program here is a synthesis of the substantial literature on alaska s boreal forest that should be accessible to professional ecologists students and the interested public
