over the last few decades skepticism about political and moral experts has grown into a serious social problem undermining the functioning of liberal democratic regimes indeed meritocracy that is government by hard working public spirited people with high levels of relevant expertise has never looked so promising as an alternative to the dangers of know nothing populism one cultural tradition has devoted sustained attention to the idea of meritocracy as well as to the cultivation of true expertise or mastery confucianism mastery dependence and the ethics of authority presents a compelling analysis of expertise and authority and examines classical confucian conceptions of mastery dependence and human relationships in order to suggest new approaches to these issues in ethics and political theory contemporary westerners are heirs to multiple traditions that are suspicious of authority especially coercive political authority we are also increasingly wary of dependence which now often seems to signify weakness neediness and pathology analysts commonly presume that both authority and dependence threaten human autonomy and are thus intrinsically problematic but these judgments are mistaken our capacity for autonomy needs to be cultivated over time through deliberate practices of training in which we depend on the guidance of virtuous and skilled teachers confucian thought provides a subtle and powerful analysis of one version of this training process and of the social supports such an education in autonomy requires as well as the social value of having virtuous and skilled leaders early confucians also argue that human life is marked by numerous interacting forms of dependence which are not only ineradicable but in many ways good on a confucian view it is natural healthy and good for people to be deeply dependent on others in a variety of ways across the full human lifespan they teach us that individual autonomy only develops within a social matrix structured by relationships of mutual dependence that can either help or hinder it including a variety of authority relations

2000-07-07

shamanism has always been of great interest to anthropologists more recently it has been discovered by westerners especially new age followers this book breaks new ground by examining pristine shamanism in greenland among people contacted late by western missionaries and settlers on the basis of material only available in danish and presented herein english for the first time the author questions mircea eliade's well known definition of the shaman as the master of ecstasy and suggests that his role has to be seen as that of a master of spirits the ambivalent nature of the shaman and the spirit world in the tough arctic environment is then contrasted with the more benign attitude to shamanism in the new age movement after presenting descriptions of their organizations and accounts by participants the author critically analyses the role of neo shamanic courses and concludes that it is doubtful to consider what is offered as shamanism
