zimmerman introduce the field of environmental engineering by engaging
the student in the comprehensive development of basic principles as well
as providing a strong focus on using engineering and informatics as
fundamental technologies along with an understanding of human
characteristics this department conducts research that contributes to
human activities by developing novel elemental technologies and system
designs the department of civil and environmental engineering offers two
graduate degrees doctor of philosophy ph d and master of science in
engineering m s e students must be admitted to one of these two degree
programs the graduate school and faculty aims to develop methodologies
for predicting designing and controlling the interactions and
concentration of each element in any space and at any time and to
establish a system of urban environmental sciences that leads to a
construction of a sustainable society welcome to the site for
