since the 1980 s market based instruments for environmental policy have become increasingly important focusing on environmental taxation in practice this volume collects key contributions on a wide range of topics including comparisons of environmental taxation schemes in different countries political economy issues and key aspects of concrete implementation it presents a wealth of ex ante and ex post analyses intended as a source of guidance for policy implementation and research the volume features a full length introduction locating the literature on environmental taxation in practice in a wider context of theoretical and applied issues

## MotorBoating

1914-06

many effects of environmental and energy policy are likely to disproportionately burden those with low income first it raises the price of fossil fuel intensive products that constitute a high fraction of low income budgets like gasoline heating fuel and electricity second the handout of pollution permits to firms provides value to those who own them third low income individuals may place more value on food and shelter than on improvements in environmental quality so high income individuals may get the most benefit of pollution abatement fourth air quality improvements may raise the value of houses owned by landlords rather than helping renters these effects might all hurt the poor more than the rich this book brings together the seminal economics literature that studies whether these fears are valid and whether anything can be done about them
