

Free pdf G k mithal radio engineering [PDF]

the book introduces the basic foundations of high mathematics and vector algebra then it explains the basic aspects of classical electrodynamics and electromagnetism based on such knowledge readers investigate various radio propagation problems related to guiding structures connecting electronic devices with antenna terminals placed at the different radar systems it explains the role of antennas in process of transmission of radio signals between the terminals finally it shows the relation between the main operational characteristics of each kind of radar and the corresponding knowledge obtained from the previous chapters electromagnetic materials have both civilian and defence applications such as novel antenna designs and protection against high power transients in densely packed printed circuits for certain applications the materials may be required to have special frequency response or polarization response to meet the component or system specifications an in depth understanding of the responses of materials to electromagnetic waves may even enable us to design and fabricate materials with properties not found in nature this book constitutes the proceedings of the symposium on electromagnetic materials which provided a forum for scientists and engineers to report the latest research findings to exchange ideas and information and to establish research links electromagnetic materials have both civilian and defence applications such as novel antenna designs and protection against high power transients in densely packed printed circuits for certain applications the materials may be required to have special frequency response or polarization response to meet the component or system specifications an in depth understanding of the responses of materials to electromagnetic waves may even enable us to design and fabricate materials with properties not found in nature this book constitutes the proceedings of the symposium on electromagnetic materials which provided a forum for scientists and engineers to report the latest research findings to exchange ideas and information and to establish research links contents dielectric composites nano composites magnetic composites metamaterials periodic structures applications shts and thin films readership researchers in materials engineering amorphous materials and applied physics keywords electromagnetics material science composite materials dielectric materials ferrite materials metamaterials
