Proceedings of the ... Ph. D. Retreat of the HPI Research School on Service-Oriented Systems Engineering 2010 keine angaben

Journal of Banking & Financial Services 2005 this volume constitutes the refereed proceedings of the following 9 international workshops otm academy otm industry case studies program cloud and trusted computing c tc enterprise integration interoperability and networking ei2n industrial and business applications of semantic technologies inbast information systems om distributed environment isde methods evaluation tools and applications for the creation and consumption of structured data for the e society meta4es mobile and social computing for collaborative interactions msc and ontology content ontocontent 2014 these workshops were held as associated events at otm 2014 the federated conferences on the move towards meaningful internet systems and ubiquitous computing in amantea italy in october 2014 the 56 full papers presented together with 8 short papers 6 posters and 5 keynotes were carefully reviewed and selected from a total of 96 submissions the focus of the workshops were on the following subjects models for interoperable infrastructures applications privacy and access control reliability and performance cloud and configuration management interoperability in system of systems distributed information systems applications architecture and process in distributed information system distributed information system development and operational environment ontology is use for esociety knowledge management and applications for esociety social networks and social services social and mobile intelligence and multimodal interaction and collaboration

International Congress Calendar 2004 this book unravels the story of english the language of the enemies in post revolutionary iran situating english within the nation s broader social political economic and historical contexts the book explores the politics causes and agents of the two diverging trends of indigenization localization and internationalization anglo americanization in english education in iran over the past three decades

On the Move to Meaningful Internet Systems: OTM 2014 Workshops 2014-10-18 advances in the engineering of sensing and acting capabilities distributed in wide range of specialized devices is providing at last an opportunity for the fundamental advances that computer science achieved in the past few decades to make an impact in our daily lives this technical confluence is matched by a unique historical context where users are better informed more aware of the benefits that technology can provide and production of more complex systems is becoming more affordable sensors actuators deployed in an environment in this context it can be any physical space like a house office classroom car street etc facilitate a link between an automated decision making system connected to that technologically enriched space this computing empowered environment enables the provision of an intelligent environment i e a digital environment that proactively but sensibly supports people in their daily lives this is an active area of research which is attracting an increasing number of professionals in academia and industry worldwide the prestigious 5th international conference on intelligent environments ie 09 is focused on the development of advanced intelligent environments and stimulates the discussion on several specific topics which are crucial to the future of the area as part of that five workshops were supported as part of ie 09 this volume is the combined proceedings of those five workshops workshop on digital object memories dome 09 workshop on rfid technology concepts practices solutions rfid 09 workshop on artificial intelligence techniques for ambient intelligence aitami 09 workshop on ethical design of ambient intelligence edami 09 workshop on smart offices and other workplaces soow 09

English in Post-Revolutionary Iran 2013 this book constitutes the refereed proceedings of nine international workshops held in beijing china in conjunction with the 11th international conference on business process management bpm 2013 in august 2013 the nine workshops comprised business process intelligence bpi 2013 business process management and social software bpms2 2013 data and artifact centric bpm dab 2013 decision mining and modeling for business processes demimop 2013 emerging topics in business process management etbpm 2013 process aware logistics systems pals 2013 process model collections management and reuse pmc mr 2013 security in business processes sbp 2013 and theory and applications of process visualization taproviz 2013 the 38 revised full papers presented were carefully reviewed and selected from 74 submissions

Workshops Proceedings of the 5th International Conference on Intelligent Environments 2009-10-02 presents the state of the technology and points to future directions for semantic computing semantic computing a rapidly evolving interdisciplinary field seeks to structure design and manipulate computer content to better satisfy the needs and intentions of users and create a more meaningful user experience this remarkable contributed work examines the art engineering technology and applications of the field moreover it brings together researchers from such disciplines as natural language processing software engineering multimedia semantics semantic signal processing and pattern recognition in order to provide a single source that presents the state of the technology and points to new breakthroughs on the horizon semantic computing begins with an introduction that explores the concepts technology applications and future of semantic computing next the book is divided into four parts part one semantic analysis part two semantic languages and integration part three semantic applications part four semantic programming and interface as readers progress through the book they ll learn not only the underlying science but also the fundamental technological building blocks of semantic computing moreover they ll discover a variety of cross disciplinary solutions to current computing and communication problems throughout the book references to the primary literature enable further investigation of each individual topic semantic computing is ideal for industrial managers researchers and engineers seeking to design the next generation of computing systems in order to better meet user needs it is also recommended as a textbook for senior undergraduate and graduate level semantic computing courses

Annual Report 2003 this book explores various aspects of software creation and development as well as data and information processing it covers relevant topics such as business analysis business rules requirements engineering software development processes software defect prediction information management systems and knowledge management solutions lastly the book presents lessons learned in information and data management processes and procedures

Business Process Management Workshops 2014-05-09 this book constitutes the thoroughly refereed proceedings of eight international workshops held in gdańsk poland in conjunction with the 24th international conference on advanced information systems engineering caise 2012 in june 2012 the 35 full and 17 short revised papers were carefully selected from 104 submissions the eight workshops were agility of enterprise systems agiles business it alignment and interoperability busital enterprise and organizational modeling and simulation eomas governance risk and compliance grcis human centric process aware information systems hc pais system and software architectures iwssa ontology models conceptualization and epistemology in social artificial and natural systems ontose and information systems security engineering wisse

Peabody Coal Company's Big Sky Area B Mine, Rosebud County, Montana 1988 this two volume set lncs 7238 and lncs 7239 constitutes the refereed proceedings of the 17th international conference on database systems for advanced applications dasfaa 2012 held in busan south korea in april 2012 the 44 revised full papers and 8 short papers presented together with 2 invited keynote papers 8 industrial papers 8 demo presentations 4 tutorials and 1 panel paper were carefully reviewed and selected from a total of 159 submissions the topics covered are query processing and optimization data semantics xml and semi structured data data mining and knowledge

discovery privacy and anonymity data management in the graphs and data mining applications temporal and spatial data top k and skyline query processing information retrieval and recommendation indexing and search systems cloud computing and scalability memory based query processing semantic and decision support systems social data data mining

Semantic Computing 2011-07-05 the models series of conferences is the premier venue for the exchange of novative technical ideas and experiences focusing on a very important new te nical discipline model driven software and systems engineering the expansion ofthisdisciplineisadirectconsequenceoftheincreasingsigni canceandsuccess of model based methods in practice numerous e orts resulted in the invention of concepts languagesand tools for the de nition analysis transformation and veri cationofdomain speci cmodelinglanguagesandgeneral purposemodeling language standards as well as their use for software and systems engineering models 2010 the 13th edition of the conference series took place in oslo norway october 3 8 2010 along with numerous satellite workshops symposia and tutorials the conference was fortunate to have three prominent keynote speakers ole lehrmann madsen aarhus university denmark edward a lee uc berkeley usa and pamela zave at t laboratories usa to provide a broader forum for reporting on scienti c progress as well as on experience stemming from practical applications of model based methods the 2010 conference accepted submissions in two distinct tracks foundations and applications the primary objective of the rst track is to present new research results dedicated to advancing the state of the art of the discipline whereas the second aims to provide a realistic and veri able picture of the current state the practice of model based engineering so that the broader community could be better informed of the capabilities and successes of this relatively young discipline this volume contains the nal version of the papers accepted for presentation at the conference from both tracks

Data-Centric Business and Applications 2019-12-14 the opportunistic network is an emerging and recent area of research to make this research area more adaptable for practical and industrial use there is a need to further investigate several research challenges in all aspects of opportunistic networks therefore opportunistic networks fundamentals applications and emerging trends provides theoretical algorithmic simulation and implementation based research developments related to fundamentals applications and emerging research trends in opportunistic networks the book follows a theoretical approach to describe fundamentals to beginners and incorporates a practical approach depicting the implementation of real life applications to intermediate and advanced readers this book is beneficial for academicians researchers developers and engineers who work in or are interested in the fields related to opportunistic networks delay tolerant networks and intermittently connected ad hoc networks this book also serves as a reference book for graduate and postgraduate courses in computer science computer engineering and information technology streams

Advanced Information Systems Engineering Workshops 2012-07-04 in neoliberalism from below first published in argentina in 2014 verónica gago examines how latin american neoliberalism is propelled not just from above by international finance corporations and government but also by the activities of migrant workers vendors sweatshop workers and other marginalized groups using the massive illegal market la salada in buenos aires as a point of departure gago shows how alternative economic practices such as the sale of counterfeit goods produced in illegal textile factories resist neoliberalism while simultaneously succumbing to its models of exploitative labor and production gago demonstrates how la salada s economic dynamics mirror those found throughout urban latin america in so doing she provides a new theory of neoliberalism and a nuanced view of the tense mix of calculation and freedom obedience and resistance individualism and community and legality and illegality that fuels the increasingly powerful popular economies of the global south s large cities

Continuing Education : a Digest of Short Courses, Seminars, Workshops, and Conferences in Science, Technology, Medicine, and Management 1969 this book reports the latest advances on the design and development of mobile computing systems describing their applications in the context of modeling analysis and efficient resource management it explores the challenges on mobile computing and resource management paradigms including research efforts and approaches recently carried out in response to them to address future open ended issues the book includes 26 rigorously refereed chapters written by leading international researchers providing the readers with technical and scientific information about various aspects of mobile computing from basic concepts to advanced findings reporting the state of the art on resource management in such environments it is mainly intended as a reference guide for researchers and practitioners involved in the design development and applications of mobile computing systems seeking solutions to related issues it also represents a useful textbook for advanced undergraduate and graduate courses addressing special topics such as mobile and ad hoc wireless networks peer to peer systems for mobile computing novel resource management techniques in cognitive radio networks and power management in mobile computing systems

Database Systems for Advanced Applications 2012-04-05 the two volume set lncs 8802 and lncs 8803 constitutes the refereed proceedings of the 6th international symposium on leveraging applications of formal methods verification and validation isola 2014 held in imperial corfu greece in october 2014 the total of 67 full papers was carefully reviewed and selected for inclusion in the proceedings featuring a track introduction to each section the papers are organized in topical sections named evolving critical systems rigorous engineering of autonomic ensembles automata learning formal methods and analysis in software product line engineering model based code generators and compilers engineering virtualized systems statistical model checking risk based testing medical cyber physical systems scientific workflows evaluation and reproducibility of program analysis processes and data integration in the networked healthcare semantic heterogeneity in the formal development of complex systems in addition part i contains a tutorial on automata learning in practice as well as the preliminary manifesto to the lncs transactions on the foundations for mastering change with several position papers part ii contains information on the industrial track and the doctoral symposium and poster session

Model Driven Engineering Languages and Systems 2010-09-21 50 cfr wildlife and fisheries

Opportunistic Networks 2021-08-19 the ultimate reference book the 5th updated edition of the famous blue guide included a dvd with new sequences completes each chapter epileptology changes the syndromic approach is completed by an etiological approach based on the major advances in genetics and functional genetics new entities have found their place and a purely descriptive electroclinical approach is no longer adapted in many circumstances the 5th edition of the blue guide includes the most recent advances it was necessary to justify the physiological epidemiologic genetic and therapeutic approaches and to consider them in the light of the new classification efforts which are still in the making nevertheless the description of epileptic syndromes both classical and recent remains at the core of this book

Neoliberalism from Below 2017-10-19 covers receipts and expenditures of appropriations and other funds

Resource Management in Mobile Computing Environments 2014-06-09 this book constitutes the revised selected papers of the combined workshops on information systems engineering wise 2011 and wise 2012 held in sydney australia in october 2011 and in paphos cyprus in november 2012 the seven workshops of wise 2011 2012 have reported the recent developments and advances in the contemporary topics in the related fields of advanced reasoning technology for e science art 2012 cloud enabled business process management cebpm 2012 engineering in the semantic enterprise ese 2012 social analysis for trend detection sowetrend 2012 big data

and cloud bdc 2012 personalization in cloud and service computing pc s 2011 and user focused service engineering consumption and aggregation useca 2011

Leveraging Applications of Formal Methods, Verification and Validation. Specialized Techniques and Applications 2014-09-26 it is with great pleasure that we present the proceedings of the 6th inter tional symposium on visual computing isvc 2010 which was held in las vegas nevada isvc provides a common umbrella for the four main areas of visual computing including vision graphics visualization and virtual reality the goal is to provide a forum for researchers scientists engineers and pr titioners throughout the world to present their latest research ndings ideas developments and applications in the broader area of visual computing this year the program consisted of 14 oral sessions one poster session 7 special tracks and 6 keynote presentations the response to the call for papers was very good we received over 300 submissions for the main symposium from which we accepted 93 papers for oral presentation and 73 papers for poster p sentation special track papers were solicited separately through the organizing and program committees of each track a total of 44 papers were accepted for oral presentation and 6 papers for poster presentation in the special tracks

Title 50 Wildlife and Fisheries Parts 600 to 659 (Revised as of October 1, 2013) 2013-10-01 the recent and novel research contributions collected in this book are extended and reworked versions of a selection of the best papers that were originally presented in french at the egc 2011 conference held in brest france on january 2011 egc stands for extraction et gestion des connaissances in french and means knowledge discovery and management or kdm kdm is concerned with the works in computer science at the interface between data and knowledge such as data mining knowledge discovery business intelligence knowledge engineering and semantic this book is intended to be read by all researchers interested in these fields including phd or msc students and researchers from public or private laboratories it concerns both theoretical and practical aspects of kdm this book has been structured in two parts the first part entitled data mining classification and queries deals with rule and pattern mining with topological approaches and with olap the second part of the book entitled ontology and semantic is related to knowledge based and user centered approaches in kdm

ICARDA Annual Report 1993 impassioned belief presents an original expressivist theory of normative judgments according to his ecumenical expressivism normative judgements are hybrid states partly constituted by ordinary beliefs and partly constituted by desire like states michael ridge builds on a series of articles in which he has developed this theory but moves beyond them in the following key respects first ridge now more sharply distinguishes semantics from meta semantics situating ecumenical expressivism firmly on the meta semantic side of this divide thus enabling ecumenical expressivism to accommodate a fully truth conditional approach to first order semantics second this distinction allows ridge to offer a distinctive contextualist semantic framework for normative discourse contra orthodox presuppositions a contextualist semantics does not entail cognitivism at least not if we carefully heed the semantics meta semantics distinction third because this contextualist framework is couched in terms of standards ridge now rejects his previous ideal advisor approach and instead adopts a theory couched in terms of acceptable standards of practical reasoning this has interesting consequences for longstanding debates over the context sensitivity of reasons the so called buck passing theory of value and the role of principles in normative thought particularism versus generalism fourth drawing on the work of scott soames ridge develops a novel theory of normative propositions according to which they are a certain kind of cognitive event type somewhat surprisingly this conception allows that there can be irreducible normative propositions even given expressivism fifth ridge offers a novel approach to talk of truth which enables expressivists to accommodate truth aptness without committing themselves to deflationism about truth in fact the theory is flexible enough that it can elegantly be combined even with a robust correspondence conception of truth in addition ridge offers an improved solution to the dreaded frege geach problem one which better preserves the formal nature of logic than his previous account a novel theory of disagreement itself a rather different sort of hybrid treatment of rationality discourse and an independently useful taxonomy and critical survey of the bewildering variety of other hybrid approaches in the literature

Epileptic Syndromes in Infancy, Childhood and Adolescence - 5th edition 2012-11-12 although there are many books available on wsns most are low level introductory books the few available for advanced readers fail to convey the breadth of knowledge required for those aiming to develop next generation solutions for wsns filling this void wireless sensor networks from theory to applications supplies comprehensive coverage of ws

Report of the Clerk of the House from ... 1995 as cameras become more pervasive in our daily life vast amounts of video data are generated the popularity of youtube and similar websites such as tudou and youku provides strong evidence for the increasing role of video in society one of the main challenges confronting us in the era of information technology is to fectively rely on the huge and rapidly growing video data accumulating in large multimedia archives innovative video processing and analysis techniques will play an increasingly important role in resolving the difficult task of video search and retrieval a wide range of video based applications have benefited from vances in video search and mining including multimedia information mana ment human computer interaction security and surveillance copyright prot tion and personal entertainment to name a few this book provides an overview of emerging new approaches to video search and mining based on promising methods being developed in the computer vision and image analysis community video search and mining is a rapidly evolving discipline whose aim is to capture interesting patterns in video data it has become one of the core areas in the data mining research community in comparison to other types of data mining e g text video mining is still in its infancy many challenging research problems are facing video mining researchers

Web Information Systems Engineering 2013-05-13 the two volume set consisting of lncs 7728 and 7729 contains the carefully reviewed and selected papers presented at the nine workshops that were held in conjunction with the 11th asian conference on computer vision accv 2012 in daejeon south korea in november 2012 from a total of 310 papers submitted 78 were selected for presentation lncs 7728 contains the papers selected for the international workshop on computer vision with local binary pattern variants the workshop on computational photography and low level vision the workshop on developer centered computer vision and the workshop on background models challenge lncs 7729 contains the papers selected for the workshop on e heritage the workshop on color depth fusion in computer vision the workshop on face analysis the workshop on detection and tracking in challenging environments and the international workshop on intelligent mobile vision

List of Reports Covering WPRO Activities 2009 this book presents cutting edge research in translation studies offering stimulating discussions on translation and providing fresh perspectives on the field papers in translation studies features a selection of papers originally authored for this volume addressing a variety of issues from different points of view and offering interesting contributions to the critical literature of the field the volume provides useful resources that will be of great benefit for academics students and practitioners the contributions to this book promote research on translation theory and practice and suggest ways of dealing with translation problems the volume chapters are written by researchers from around the world and consider various different languages and contexts areas of investigation include contrastive linguistics and translation corpus based translation studies natural language processing machine translation and translator training

Advances in Visual Computing 2010-11-19 this book is a comprehensive and in depth reference to the most recent developments in the field covering theoretical developments techniques technologies among others provided by publisher

Proceedings of the Workshop on Cataloguing and Classification (held on 18-21 & 24 February 1992) and on Filing and Shelving (held on 26-28 February 1992) at the University of Zambia Library 1996 at dart 09 held in conjunction with the 2009 ieee wic acm international conference on intelligence wi 2009 and intelligent agent technology iat 2009 in milan italy practitioners and researchers working on pervasive and intelligent access to web services and distributed information retrieval met to compare their work ad insights in such fascinating topics extended and revised versions of their papers together with selected and invited original contributions are collected in this book topics covered are those that emerged at dart 09 as the most intriguing and challenging i community oriented tools and techniques as infrastructure of the 2 0 ii agent technology applied to virtual world scenarios iii context aware information retrieval iv content based information retrieval and v industrial applications of information retrieval every chapter before discussing in depth the specific topic presents a comprehensive review of related work and state of the art in the hope of this volume to be of use in the years to come to both researchers and students

Advances in Knowledge Discovery and Management 2012-12-30 this book contains the refereed proceedings of the 12th international conference on business process modeling development and support bpmds 2011 and the 16th international conference on exploring modeling methods for systems analysis and design emmsad 2011 held together with the 23rd international conference on advanced information systems engineering caise 2011 in london uk in june 2011 the 22 papers accepted for bpmds were selected from 61 submissions and cover a wide spectrum of issues related to business processes development modeling and support they are grouped into sections on bpmds in practice business process improvement business process flexibility declarative process models variety of modeling paradigms business process modeling and support systems development and interoperability and mobility the 16 papers accepted for emmsad were chosen from 31 submissions and focus on exploring evaluating and enhancing current information modeling methods and methodologies they are grouped in sections on workflow and process modeling extensions requirements analysis and information systems development requirements evolution and information systems evolution data modeling languages and business rules conceptual modeling practice and enterprise architecture

Engineering 1890 subtle body practices are found particularly in indian indo tibetan and east asian societies but have become increasingly familiar in western societies especially through the various healing and yogic techniques and exercises associated with them this book explores subtle body practices from a variety of perspectives and includes both studies of these practices in asian and western contexts the book discusses how subtle body practices assume a quasi material level of human existence that is intermediate between conventional concepts of body and mind often this level is conceived of in terms of an invisible structure of channels associated with the human body through which flows of quasi material substance take place contributors look at how subtle body concepts form the basic explanatory structure for a wide range of practices these include forms of healing modes of exercise and martial arts as well as religious practices aimed at the refinement and transformation of the human mindbody complex by highlighting how subtle body practices of many kinds have been introduced into western societies in recent years the book explores the possibilities for new models of understanding which these concepts open up it is a useful contribution to studies on asian religion and philosophy

Impassioned Belief 2014-03-13 this book contains the invited and contributed papers selected for presentation at sofsem 2021 the 47th international conference on current trends in theory and practice of computer science which was held online during january 25 28 2021 hosted by the free university of bozen bolzano italy the 33 full and 7 short papers included in the volume were carefully reviewed and selected from 100 submissions they were organized in topical sections on foundations of computer science foundations of software engineering foundations of data science and engineering and foundations of algorithmic computational biology the book also contains 5 invited papers
