this book demonstrates how clausewitzian thought influenced american strategic thinking between the vietnam war and the current conflict in iraq carl von clausewitz s thought played a part in the process of military reform and the transition in us policy that took place after the vietnam war by the time of the 1991 gulf war american policy makers demonstrated that they understood the clausewitzian notion of utilizing military force to fulfil a clear political objective the us armed forces bridged the operational and strategic levels during that conflict in accordance with clausewitz s conviction that war plans should be tailored to fulfil a political objective with the end of the cold war and an increasing predilection for technological solutions american policy makers and the military moved away from clausewitz it was only the events of 11 september 2001 that reminded americans of his intrinsic value however while many aspects of the war on terror and the conflict in iraq can be accommodated within the clausewitzian paradigm the lack of a clear policy for countering insurgency in iraq suggests that the us may have returned full circle to the flawed strategic

approach evident in vietnam clausewitz and america will be of great interest to students of strategy military history international security and us politics

## Quarterly Review of Military Literature

2012-01-30

why have militaries so often failed to learn from conflict and war why for example despite years of unsuccessful counterinsurgency experiences in vietnam and el salvador and repeated recommendations from official army studies has the u s army not changed its doctrine for counterinsurgency writing for scholars as well as military professionals and policymakers downie examines the sources of doctrinal change and innovation from a theoretical perspective and derives practical and relevant policy recommendations contrasting with other findings in this field downie provides case studies showing that neither external pressure

on a military nor institutional recognition of the requirement for doctrinal change is sufficient to explain the process of doctrinal change a military innovates when it learns by proceeding through a learning cycle that includes achieving an organizational consensus that permits adoption of new approaches that respond to factors that make existing doctrine deficient when that process is blocked militaries are left with outmoded doctrinal approaches that constrain military performance and lead to defeat this is an important study for military leaders civilian policymakers and scholars and researchers dealing with contemporary u s military issues
