Mountain Rescue Vehicles

2024-05-21

mountain search and rescue is one of the most demanding rescue activities of them all it take place under very severe and often dramatic conditions like high altitude snow and ice crevasses glaciers and avalanches it is the stuff of real heroic acts and romance the occassional demand for assistance but on a larrge scale is then often carried out by volunteers mainly locals due to the demand for local area and climate knowledge this book is mainly focussed on the alps but also visits outhere european mountaineous areas the special conditions has led to the development of specialized equipment and the most visible is the widespread use of helicopters which have a high degree af maneouverability in inacessible terrain and ability to carry a payload the helicopter services work together with traditionsl ground based teams and sometimes move these teams to the search area helicopters swiftly move injured persons to a medicsl facility professional mountain rescue services are quite common near tourist resorts like ski resorts where there is a regular demand the authors have made a similar book on american air rescue and the styles have both similarity and differences

this book contains a collection of studies on the interactions between businesses in africa and global value chains gvcs in terms of social environmental and economic sustainability this is particularly pertinent given the asymmetrical power distribution between the global buyer and the african supplier their governance relationships and the ongoing competitive pressures to reduce costs and increase flexibility to meet gvc demands rather than focusing on the sustainability of a single organization gvcs address the sustainability of inter firm value chains and global industries as a whole with little differentiation between value chain creation and social environmental degradation extending to people and raw material extraction upstream and disposal or recycling downstream sustainability issues need to be at the forefront of african business research interests nowadays sustainability is considered a competitive advantage for a firm looking to join a gvc whether sustainability is approached from the viewpoint of an exporting firm motivated to join a gvc in its respective industry or whether a firm s continuing contractual or collaborative relationship with a buyer depends on its compliance with sustainability standards both approaches focus on the ability of firms in africa to benefit from joining sustainable gvcs
