infoworld is targeted to senior it professionals content is segmented into channels and topic centers infoworld also celebrates people companies and projects

Novell Linux Certification Practicum Lab Manual

1993

here are great ideas and tools for smarter more effective hp ux system administration the book is a thorough guide for system administrators from the basics of system set up to the most advanced tips n tricks for maximizing performance and troubleshooting the two cd roms contain an unprecedented collection of trial software for hp ux administration development and interoperability with nt systems

CONVEX Mini Manual

1997

compressed air systems are the third most important utility to industry and are commonly the most misunderstood written to appeal to operators mechanics and junior engineers this manual is designed to provide a solid understanding of common compression systems and operations techniques using this book the users learn tips and techniques for creating a baseline of system performance determining the impact of different compressors and compressor control types for the job at hand and learning basic approaches to general maintenance

Fire Controlman, Volume 6-Digital Communications, Training Manual (TRAMAN) and Nonresident Training Course (NRTC), July 1997

1991

contains a compendium of the most frequently used data in day to day telecommunications engineering work tables graphs figures formulae nomograms performance curves standards highlights constants and statistics designed for easy and rapid access comprehensive reference for designing building purchasing using or maintaining all kinds of telecommunications systems central source of information on transmission switching traffic engineering numbering signaling noise modulation and forward error correction

Finding HP-UX Information

1991

this book examines information technology standards and discusses what they are what they do how they originate and how they evolve while standards are important in improving system interoperability and thereby increasing economic productivity they are unlikely to achieve their full potential due to a variety of factors chief of which is the politics of the standard process itself libicki points out that the government is not likely the best source for designing and promoting standards he does an excellent job of breaking down many complex technical issues and presenting them in a fashion that technical people can enjoy and policy makers can understand
