era of scarcity exacerbated by growing consumption and the threat from islamic terrorism in the oil rich middle east maugeri argues that the pessimists are wrong in the second part of his book he debunks the main myths surrounding oil in our times addressing whether we are indeed running out of oil and the real impact of islamic radicalism on oil rich regions by translating many of the technical concepts of oil productions into terms the average reader can easily grasp maugeri answers our questions ultimately he concludes that the wolf is not at the door we are facing neither a problem of oil scarcity nor an upcoming oil blackmail by forces hostile to the west only bad political decisions driven by a distorted view of current problems and who is to blame for them can doom us to a gloomy oil future
