set against a backdrop of breathtaking natural beauty brazil's striking modernist architecture has long garnered international acclaim but these well known works are not fully reflective of the built environment of brazil and with this volume richard williams unearths the rich architectural heritage of brazil spanning from 1945 through today the book examines brazilian architecture beyond the works of renowned architects such as oscar niemeyer and the carioca architects of rio de janeiro williams investigates issues such as the use of historic architecture the importance of leisure and luxury the role of the favela as a backdrop and inspiration for development and the rapid growth of cities from the designated world heritage site of brasilia a capital city that was planned from the ground up to the installation work of artists such as hélio oiticica brazil delves into the origins and far reaching influence of brazil's architectural modernism at a moment when latin america is of increasing importance in global business and culture brazil will be an essential read for all scholars of architecture and latin american history

History of Modern Architecture 1977

a serious and original study of the beginnings and development of modernism in which the pictorial aspects are designed to aid in the communication of the author's closely reasoned formulations let it be said at once that the format of this work is richly handsome it is a two volume boxed set comprising 844 pages and well over 1 000 high quality illustrations and it reflects throughout its publisher's conviction that good design is an essential not superficial part of bookmaking beyond that it should be emphasized that this work is not another facile cultural tour of modern architecture it is a serious and original study of the beginnings and development of modernism in which the pictorial aspects are designed to aid in the communication of the author's closely reasoned formulations rather than to gloss over a lack of substantive content the book is a translation of the third italian edition published in 1966 benevolo who is on the faculty of architecture in venice has earned an international reputation as a historian of architecture and town planning and his publications embrace the span of time from the renaissance to the foreseeable future one such publication the origins of modern town planning the mit press 1967 may be read as a prelude to the present work as well as an independent contribution perhaps more than any other architectural historian in our time benevolo has made a determined effort to place developments in design and planning in their proper social and political settings indeed the author argues that the development of the modern movement in architecture was determined not by aesthetic formalisms but largely by the social changes that have occurred since about 1760 after the middle of the eighteenth century without the continuity of formal activity being in any way broken indeed while architectural language seems to be acquiring a particular coherence the relations between architect and society began to change radically new material and spiritual needs new ideas and modes of procedure arise both within and beyond the traditional limits and finally they run together to form a new architectural synthesis that is completely different from the old one in this way it is possible to explain the birth of modern architecture which otherwise would seem completely incomprehensible this second volume is concerned with the modern movement proper from 1914 to 1966 the author emphasizes the unity of the movement rejecting the usual treatment that allots to the individual architects separate and unconnected biographical accounts benevolo remarks at one point when one talks about modern architecture one must bear in mind the fact that it implies not only a new range of forms but also a new way of thinking whose consequences have not yet all been calculated his main concern is to provide a more exact calculation of those

consequences

India 2015-02-15

a place of astonishing contrasts india is home to some of the world s most ancient architectures as well as some of its most modern it was the focus of some of the most important works created by le corbusier and louis kahn among other lesser known masters and it is regarded by many as one of the key sites of mid twentieth century architectural design as peter scriver and amit srivastava show in this book however india s history of modern architecture began long before the nation s independence as a modern state in 1947 going back to the nineteenth century scriver and srivastava look at the beginnings of modernism in colonial india and the ways that public works and patronage fostered new design practices that directly challenged the social order and values invested in the building traditions of the past they then trace how india s architecture embodies the dramatic shifts in indian society and culture during the last century making sense of a broad range of sources from private papers and photographic collections to the extensive records of the indian public works department they provide the most rounded account of modern architecture in india that has yet been available

Modern Architecture in Historic Cities 2003-09-02

modern architecture in historic cities illustrates why france has been so successful in combining conservation and modernity and points to important lessons for other countries which can be drawn from the french experience beginning with an empirical review of particular events which have affected attitudes towards heritage in france this book highlights the continuity in french thinking and the longstanding role of the french government as patron and leader planning conservation and design control legislation are examined highlighting the range of instruments available to government in order to influence results and enhance the role of the architectural profession

Modern Architecture Since 1900 1987

a penetrating analysis of the modern architectural tradition and its origins since its first publication in 1982 modern architecture since 1900 has become established as a contemporary classic worldwide in scope it combines a clear historical outline with masterly analysis and interpretation technical economic social and intellectual developments are brought together in a comprehensive narrative which provides a setting for the detailed examination of buildings throughout the book the author's focus is on the individual architect and on the qualities that give outstanding buildings their lasting value for the third edition the text has been radically revised and expanded incorporating much new material and a fresh appreciation of regional identity and variety seven chapters are entirely new including expanded coverage of recent world architecture described by james ackerman of harvard university as immeasurably the finest work covering this field in existence this book presents a penetrating analysis of the modern tradition and its origins tracing the creative interaction between old and new that has generated such an astonishing richness of architectural forms across the world and throughout the century

Finland 2006-03-15

buildings speak volumes not just about their occupants or owners but about the countries in which they exist from colonnades to paving stones the architecture of any building does more than simply date the structure it celebrates the spirit of a people and a nation roger connah's latest book finland explores the culture and democratic spirit of a country whose buildings carry the indelible markings of finland's political and physical climate nearly all of the country's buildings were constructed after 1917 when finland gained its independence from russia the resulting architecture often springing from hugely popular public competitions is emphatically democratic in structure and usage finland's extreme northern latitudes for their part have given rise to buildings with an acute sensitivity to the physical environment and to the delicate interplay of light and shadow from museums to schools to subsidized housing developments connah's finland is an important survey of the country's architecture fully illustrated and with detailed examinations of many of the finnish master architects including alvar aalto it is also a valuable contribution to the studies of modern architecture and nordic history

Guide to Modern Architecture 1962

modern architecture in latin america art technology and utopia is an introductory text on the issues polemics and works that represent the complex processes of political economic and cultural modernization in the twentieth century the number and types of projects varied greatly from country to country but as a whole the region produced a significant body of architecture that has never before been presented in a single volume in any language modern architecture in latin america is the first comprehensive history of this important production designed as a survey and focused on key examples paradigms arranged chronologically from 1903 to 2003 this volume covers a myriad of countries historical social and political conditions and projects developments that range from small houses to urban plans to architectural movements the book is structured so that it can be read in a variety of ways as a historically developed narrative of modern architecture in latin america as a country specific chronology or as a treatment of traditions centered on issues of art technology or utopia this structure

allows readers to see the development of multiple and parallel branches historical strands of architecture and at times their interconnections across countries the authors provide a critical evaluation of the movements presented in relationship to their overall goals and architectural transformations

Modern Architecture in Latin America 2015-01-05

the history of modern architecture as constructed by historians and key texts writing according to panayotis tournikiotis has always exerted a powerful influence on architecture indeed the study of modern architecture cannot be separated from a fascination with the texts that have tried to explain the idea of a new architecture in a new society during the last forty years the question of the relationship of architecture to its history of buildings to books has been one of the most important themes in debates about the course of modern architecture tournikiotis argues that the history of modern architecture tends to be written from the present projecting back onto the past our current concerns so that the beginning of the story really functions as a representation of its end in this book the buildings are the quotations while the texts are the structure tournikiotis focuses on a group of books by major historians of the twentieth century nikolaus pevsner emil kaufmann sigfried giedion bruno zevi leonardo benevolo henry russell hitchcock reyner banham peter collins and manfredo tafuri in examining these writers thoughts he draws on concepts from critical theory relating architecture to broader historical models

The Historiography of Modern Architecture 2001-02-27

this new account of international modernism explores the complex motivations behind this revolutionary movement and assesses its triumphs and failures the work of the main architects of the movement such as frank lloyd wright adolf loos le corbusier and mies van der rohe is re examined shedding new light on their roles as acknowledged masters alan colquhoun explores the evolution of the movement from art nouveau in the 1890s to the megastructures of the 1960s revealing the often contradictory demands of form function social engagement modernity and tradition

Modern Architecture 2002-04-25

the legacy of the modern movement has gained legendary status largely as a result of the appreciation of the masterworks and the visionary architectural concepts in the reality of everyday life however it has been difficult to maintain the architectural creations of the modern movement in such a way that they still reflect the original intentions of their designers many buildings and ensembles of the modern movement have already been saved the icons amongst these have even become so precious that they are treated like pieces of art rather than as buildings in everyday use but despite the successes that have been achieved many buildings and ensembles are still at risk of demolition or maltreatment the bi annual international conference is one means by which it is possible to continue furthering the aims of docomomo knowing that many modern architects aimed at functionality and changeability the challenge for today is how to deal with the modern heritage in relation to its continuously changing context including physical economic and functional changes as well as socio cultural political and scientific ones it is with this in mind that conservation in general and the conservation of modern architecture in

particular has become a new challenge rather than attempting to return a modern building to its presumed original state our challenge is to revalue the essence of the manifold manifestations of modern architecture and redefine its meanings in our changing world of digital revolution worldwide mobility and environmental awareness jacket

The Challenge of Change 2008

a welcome addition to the history of the modern movement this new book is a fully illustrated description of modern architecture in brazil from 1929 1959
