Lessons from New American Schools Development Corporation's Demonstration Phase 1809 this now classic work challenges what ryle calls philosophy s official theory the cartesian myth of the separation of mind and matter ryle s linguistic analysis remaps the conceptual geography of mind not so much solving traditional philosophical problems as dissolving them into the mere consequences of misguided language his plain language and essentially simple purpose put him in the tradition of locke berkeley mill and russell philisophers whose best work like ryle s has become a part of our general literature

Entertaining Demonstrations ... or practical lessons on Astronomy, Geography, Navigation, etc. explained upon several new Patent Machines ... invented by Major General Grant 1983-01-01 the policing of the g20 protests in april 2009 was a remarkably successful operation more than 35 000 protesters demonstrated in the centre of london with a police presence of several thousand yet there was a minimum of disruption aside from a few high profile incidents the policing of the g20 protests passed without drama however these incidents and the tactics that led to them caused considerable adverse comment and have the potential to damage the public s faith in the police the use of containment detaining people in a confined area for a sustained period of time and distraction tactics the controlled use of force against those who appear hostile while legitimate according to the police rule book shocked the public whether they should continue to be used must form the basis of a wide ranging discussion on the future policing of public protests police communications with the media and the protesters must also improve this would require the police media and protesters to engage better with one another both before and during the protest there are no circumstances in which it is acceptable for officers not to wear identification numbers and urgent action must be taken to ensure that officers have the resources to display identification at all times those officers found to be consciously removing their identification numbers must face the strongest possible disciplinary measures while the vast majority of officers on duty performed very well the committee is concerned that untrained and inexperienced officers were placed in such a highly combustible atmosphere it cannot condone the use of untrained inexperienced officers on the front line of a public protest and feel that an element of luck must be attributed to the success of the operation
