male intergenerational intimacy historical socio psychological and legal perspectives research on homosexuality

~~quick access to the essential information needed to evaluate a patient on a~~
subspecialty consult service the washington manual of hematology and oncology
subspecialty consult has been completely reviewed revised and follows the bulleted
format and template of the washington manual of medical therapeutics 33 e to allow
for quick readily accessible information this edition has been updated to include
new standards in the treatment of malignancies and hematologic disorders mechanisms
of action of new therapeutic agents and the current use of molecular prognostic
factors the information in each chapter is now presented in a consistent format with
important references cited the manual is a practical reference for fellows residents
and medical students rotating on hematology and oncology subspecialty services most
of the authors are hematology oncology fellows or internal medicine residents the
physicians who have recent experience with the issues and questions that arise in
the course of training in these subspecialties primary care practitioners and other
health care professionals also will find this manual useful as a quick reference
source in hematology and oncology features include new templated format same as the
washington university medical therapeutics 33e contains synopsis of symptoms signs
and problems encountered in their daily workflow in a bulleted format for quick
salient points includes new standards in the treatment of malignancies and
hematologic disorders mechanisms of action of new therapeutic agents and the current
use of molecular prognostic factors this edition of the sages manual of hernia
surgery aligns with the current version of the new sages university masters program
hernia surgery pathway this manual serves as a curriculum for participants in the
masters program as well as a modern text on hernia surgery for all learners hernia
surgery is one of the fastest developing fields in general surgery today there have
been rapid advancements in hernia techniques in recent years making most prior texts
on the subject obsolete these advancements involve significant evolution in both the
techniques and strategies for hernia repairs as well as the tools used to achieve
these means this text thoroughly addresses the multiple component separation
techniques and options for locations of mesh repairs it also discusses the
revolution of hernia repair being facilitated by robotic surgery which allows
increased access to minimally invasive techniques for surgeons and thus increased
access to minimally invasive surgical repairs for patients this manual will be a
valuable resource for interested surgeons to understand the variety of potential
approaches to individual hernias and to individually tailor the care of the hernia
patient the information nurses need when where and how they need it nursing focused
and easy to read this full color manual delivers all the information you need to
understand how tests work interpret their results and provide quality patient care
pre test intra test and post test tests and procedures are listed in alphabetical
order by their complete name for quick reference the integrated index allows fast
searches by abbreviation synonym disease disorder specimen type or test
classification the must have resource drawing together all aspects of hospital care
of the horse and specialist techniques in equine medicine written by a team of over
30 international experts working at the cutting edge of equine medicine and surgery
the emphasis is on practical easy to access information with a sound basis in
evidence based medicine and full references for further enquiry the equine hospital
manual covers the range of procedures used on hospitalized adult horses and foals
from the simple to the advanced the book is liberally illustrated with photographs
and line drawings covering basic skills including physical examination blood
collection and bandaging advanced skills including mechanical ventilation lung
biopsy and cardiac output measurement designing and setting up an equine hospital
biosecurity therapeutic drugs used in horses and their doses nutrition for hospital
patients including tpn and ppn fluid therapy choices amounts and pitfalls
anaesthesia equipment techniques and post operative care including analgesia
reflecting the substantial trend in recent years to treat horses in a hospital
rather than in the field this book provides all you need to know whether you have
one or one hundred horses
