**Racing the Storm** 1981 stunning history at its very best a blend of impeccably researched scholarship genuinely revelatory primary sources and a beautifully written narrative james holland the sheer brutal intimacy of his descriptions of the fighting are extraordinary frederick taylor a wonderful and important and timely book alexander kershaw new york times bestselling author of the bedford boys and first wave an authoritative and unforgettable insight into the decisive days of that most terrible struggle on the banks of the volga jonathan dimbleby an utterly gripping read james holland macgregor writes with great fluency and narrative drive compellingly terse william boyd magisterial dan snow the sacrifices that enabled the soviet union to defeat nazi germany in the great patriotic war 1941 45 are sacrosanct the foundation of their eventual victory was laid during the battle for the city of stalingrad resting on the banks of the river volga for germany the catastrophic defeat was the beginning of their eventual demise that would see the red army two years later flying their flag of victory above the reichstag stalingrad is seen as the pivotal battle of the second world war with over two million civilians and combatants either killed wounded or captured during the bitter winter of september 1942

both sides endured terrible conditions in brutal house to house fighting reminiscent of the great war within this life and death struggle for the heart of the city and situated on the frontline was a key strategic building codenamed the lighthouse here a small garrison of red army guardsmen withstood german aerial bombardments and fought off daily assaults of infantry and armour red army newspaper reports at the time would be seized upon by the moscow media needing to place a positive spin on the fighting that had at one point looked beyond salvation by the end of the war the story of this building would gather further momentum to inspire russians to rebuild their destroyed towns and cities until it became the legend it is today renamed after the simple sergeant who had supposedly led the defence pavlov s house in time for the eightieth anniversary the lighthouse of stalingrad will shed fresh insight on this iconic battle through the prism of the men who fought one another over five months and the officers who commanded them a riveting narrative informed by both german and russian archives to unearth unpublished memoirs and eyewitness testimonies from veterans and civilians alike this book will celebrate the real heroes and provide a truer picture of how this mighty battle finally ended

International Economic Policy 2022-07-28 in her very successful book the schwarzbein principle renowned endocrinologist diana schwarzbein introduced her scientifically proven conclusion that degenerative diseases are not genetic but acquired many studies have supported this proving that life expectancy is 75 to 90 percent due to habits and only 10 to 25 percent due to genetics this means that someone who is genetically destined to die at age 100 may not live past age 60 because of poor habits and lifestyle choices that cause accelerated aging and premature death conversely a person can live to 100 and be functionally healthy in this highly anticipated follow up diana schwarzbein m d goes beyond the diet she introduced in her first book which literally helped thousands of people lose weight and offers a personalized anti aging program for readers to heal their metabolisms and stop advanced aging in its tracks weaving in groundbreaking research and provocative case studies including her own regeneration and that of her clients she leads readers through a series of eye opening questionnaires which identify where they are on their path to either accelerated or healthy aging based on

readers answers she leads them to the how to sections which explain in easy to follow and personalized detail the steps they need to take to restore healthy functioning for each unique situation she covers five areas nutrition hormone replacement therapy if needed tapering off toxic chemicals or avoiding them completely cross training exercises and stress management the schwarzbain principle ii is sure to follow the success of the first book and will help people live a more healthful lifestyle by embracing a regeneration process to prevent and reverse accelerated aging

*The Lighthouse of Stalingrad* 2010-01-01 this book offers the first systematic study of how the anthropocene is reported in mass media globally drawing parallels between the use or misuse of the term and the media s attitude towards the associated issues of climate change and global warming identifying the potential dangers of the anthropocene provides a useful path into a variety of issues that are often ignored misrepresented or sidelined by the media these dangers are widely discussed in the social sciences environmental humanities and creative arts and this book includes chapters on how the contributions of these disciplines are reported by the media our results suggest that the natural science and mass media establishments and the business and political interests which underpin them tend to lean towards optimistic reassurance the good anthropocene rather than pessimistic alarmist stories in reporting the anthropocene in this volume contributors explore how dangerous this neutralizing of the anthropocene is in undermining serious global action in the face of the potential existential risks confronting humanity the book presents results from media in more than 100 countries in all major languages across the globe it covers the reporting of key environmental issues such as the impact of climate change and global warming on oceans forests soil biodiversity and the biosphere we offer explanations for differences and similarities in how the media report the anthropocene in different regions of the world in doing so the book argues that though it is still controversial the idea of the anthropocene helps to concentrate minds and behaviour in confronting ongoing ecological and coronavirus crises the anthropocene in global media will be of interest to students and scholars of environmental studies media and communication studies and the environmental humanities and all those who are concerned about the survival of humans on

**Surviving the Holocaust and Stalin** 2022-07-11 many marital relationships that dissolve could survive and even thrive if the couple realized that there is an art and science to love and intimacy and were willing to learn and practice it this involves learning how to experience the difference between our ego and our self quieting the mind through meditation using methods both traditional and home made is the key to this experience it is the felt sense of the deep self within that moves us to choose to be kind or considerate when our egos would have

us behave otherwise when we extend ourselves in friendship a genuine fondness for one another begins to grow which then nurtures the soul of our relationship cultivating these qualities promotes deep spiritual partnership and long term intimacy this book offers both principles and practices for those who feel they may be ready to engage this kind of soul centered learning russell crescimanno ph d is professor emeritus at piedmont virginia community college he has been teaching courses in sociology for forty years one in particular called marriage and family relations became his passion as both his personal life and the climate of the culture regarding marriage and divorce changed over time he has also been a student and practitioner of the science of meditation and self realization for twenty years this work has complemented his specialization in the sociology of knowledge and his desire to understand how society shapes human consciousness and therefore our relationships motivated by the growing divorce rate in the country the painful stories of so many students who come from broken homes and the dissolution of his first two marriages he has been increasingly invested in learning what it takes to keep love alive and what we now know is sure to deaden it

**Grieving Suicide** 2019-05-21 this book investigates the way that the molecular sciences are shaping contemporary security practices in relation to the governance of biological threats in response to biological threats such as pandemics and bioterrorism governments around the world have developed a range of new security technologies called medical countermeasures to protect their populations this book argues that the molecular sciences influence has been so great that security practices have been molecularised focusing on the actions of international organisations and governments in the past two decades this book identifies two contrasting conceptions of the nature or inherent workings of molecular life as driving this turn on the one hand political notions of insecurity have been shaped by the contingent or random nature of molecular life on the other the identification of molecular life s constant biological dynamics supports and makes possible the development and stockpiling of effective medical countermeasures this study is one of the few to take seriously the conceptual implications that the detailed empirical workings of biotechnology have on security practices today this book will be of much interest to students of security studies bio politics life sciences global
