India's Late, Late Industrial Revolution

2012-05-24

the mga truly marked a revolution in mg sports car design with its appearance quite unlike any previous production car from the celebrated british marque entering production in the summer of 1955 it broke with the time honoured tradition of narrow gutted flat sides upright styling with the distinctive large grille exposed headlamps separate wings and sharply cut off tail that had serviced the majority of mg sports cars for well over thirty years many die hard mg enthusiasts of the time were understandably outraged but the decision to break with tradition proved to be a good one over 100 000 cars were produced over the model s seven year lifetime this book from celebrated author david knowles covers the circumstances that led to the momentous decision to make such a fundamental design change the production publicity and evolution of each and every mga variant from launch in 1955 to the end of production in 1962 with specification tables for each model profiles of the people who had crucial roles in the development of the mga and finally the largely untold story of overseas assembly in australia ireland mexico and south africa it offers comprehensive coverage of racing and rallying in europe including the mga entries at sebring twelve hour race and where many of the cars ended up and will be of great interest to all motoring enthusiasts and those particularly interested in mg it is extensively illustrated with 200 colour and 300 black white photographs much of it drawn from archives and family collections as well as photoshoots specially commissioned for this book

david knowles has been researching and writing about british cars for over twenty five years

The Light Car

1956-07

about this time my father bought a uk made austin a40 car i was so fascinated by the variety of technologies employed in the car that almost every after lunch on sundays when my father would take his usual afternoon snooze i would shut myself in the garage and open different sections parts of the car to see how they were made and worked for example i would open the carburetor starter generator distributor brakes master cylinder turn signal indicator dashboard instruments windscreen wiper motor drive etc just to see what was inside and to try to understand how they worked this continued for several months without the knowledge of my father until one day my sister revealed this news to my father instead of shouting at me or abusing me for this mischief my father took the whole incident in a most unexpectedly positive manner considering that i had done all this for so long without causing any impairment or impediment to the car he insisted that i personally set right all future problems encountered in the car from then on i did mostly all car repair jobs all by myself except decarbonizing the engine and replacing the clutch discs which i could not do without the physical help of an assistant

Light Car and Cyclecar

1956

a guide to quality assured b b guest accommodation in england this book contains listings of over 10 000 establishments accommodation is listed by regions and town order and descriptions are included for all main towns with information on visitor attractions events and tourist information centers

Ultimate Collector Car Price Guide

1997
