from his cult classic i smell esther williams to his wildly popular and insightful column wild kingdom appearing in esquire magazine every month mark leyner has been giving us up close and personal encounters of the most hilarious kind for over a decade now in his new novel the tetherballs of bougainville leyner shares with us long last the quintessential coming of age story that every writer at some point is compelled to tell in the novel we meet young mark leyner 13 years old to be exact as he waits in a new jersey prison to witness his father s execution adolescence is never easy and it just so happens that this junior high schooler is on deadline to turn in a screenplay for which he has already been awarded the vincent and lenore digiacomo oshimitsu

polymers america award and as it was for all of us during our teenage years nothing seems to go as planned written as autobiography screenplay and movie review the tetherballs of bougainville twists three familiar narrative forms into an outlandishly compelling story leyner's use of the media driven formats brilliantly reflects our secret shameful and hilarious desire to experience our private lives as mass entertainment the tetherballs of bougainville skewers and celebrates american pop culture in the late twentieth century leyner's version of our lives is so deeply funny because it is so painfully true

the story of a pioneering microcomputer its beginnings as part of a national computer literacy project its innovative hardware and its creative uses in 1982 the british broadcasting corporation launched its computer literacy project intended to introduce interested adults to the world of computers and computing the bbc accompanied this initiative with television programs courses books and software an early experiment in multi platform education the bbc along with acorn computers also introduced the bbc microcomputer which would be at the forefront of the campaign the bbc micro was designed to meet the needs of users in homes and schools to demystify computing and to counter the general pessimism among the media in britain about technology in this book alison gazzard looks at the bbc micro examining the early capabilities of multi platform content generation and consumption and the multiple literacies this approach enabled not only in programming and software creation but also in accessing information across a range of media and in do it yourself computing she links many of these early developments to current new media practices gazzard looks at games developed for the bbc micro including granny's garden an educational game for primary schools and elite the seminal space trading game she considers the shift in focus from hardware to peripherals describing the teletext adapter as an early model for software distribution and the domesday project which combined texts video and still photographs as a hypermedia like experience gazzard's account shows the bbc micro

not only as a vehicle for various literacies but also as a user oriented machine that pushed the boundaries of what could be achieved in order to produce something completely new
