Emergency alerting 2013 an effective system to alert the public during emergencies can help reduce property damage and save lives in 2004 the federal emergency management agency fema initiated the integrated public alert and warning system ipaws with the goal of integrating the nation s emergency alert system eas and other public alerting systems into a comprehensive system in 2009 the government accountability office gao reported on long standing weaknesses with eas and fema s limited progress in implementing ipaws subsequently fema and the fcc conducted the first ever nation wide eas test in november 2011 this book examines recent efforts to implement ipaws and improve eas how ipaws capabilities have changed since 2009 and what barriers if any affect its implementation and the results of the nation wide eas test and federal efforts to address identified weaknesses are discussed

Emergency Alert System 2013 a report on the issue of levels of formaldehyde fm reportedly emanating from travel trailers issued by fema after hurricanes katrina and rita hit the gulf coast in 2005 fema distributed these trailers for use as temporary housing for those displaced as a result of the storms this interim report evaluates the issue of fm and the trailer manufacturers who supplied units to fema after the 2005 hurricanes it discusses the reasons the results of epa and cdc studies are not without controversy agencies had widely varying and inconsistent concerns about fm and discusses the absence of federal standards regulating fm in indoor air this report does not address the possible health effects assoc with elevated or prolonged exposure to fm illness

*Emergency preparedness and the licensing process for commercial nuclear power reactors* 1985 this edition reflects the changes in mapping policy and technical procedures that have been adopted by the federal emergency management agency preface

**This is Not a Test** 2009 the national flood insurance program nfip has been on a high risk list since march 2006 because of concerns about its long term financial solvency and related operational issues significant management challenges also affect the federal emergency management agency s fema ability to administer nfip this report examines 1 the extent to which fema s management practices affect the administration of nfip 2 lessons learned from the cancellation of fema s attempt to modernize nfip s insurance management system and 3 limitations on fema s authority that could affect nfip s financial stability includes recommendations charts and tables this is a print on demand report

*Manufacturers of FEMA Trailers and Elevated Formaldehyde Levels* 2009 the report reviews fema s activities in response to hurricane katrina which details fema s responsibilities for three of the four major phases of disaster management preparedness response and recovery during the first five weeks of the federal response in addition the contributors evaluated fema s preparedness and readiness efforts over the past ten years to determine its organizational capability and posture prior to hurricane katrina executive summary

*FEMA Newsletter* 1985 quick response to natural and man made disasters can mean the difference between life and death for trapped victims this is a step by step guide to training dogs to the fema level for this important work

**FCC Record** 2014-10 an effective system to alert the public during emergencies can help reduce property damage and save lives in 2004 the fed emergency mngt agency fema initiated the integrated public alert and warning system ipaws with the goal of integrating the nation s emergency alert system eas and other public alerting systems into a comprehensive alerting system in 2009 gao reported on long standing weaknesses with eas and fema s limited progress in implementing ipaws subsequently fema and the fed communications comm fcc conducted the first ever nationwide eas test in november 2011 this report examined 1 how ipaws capabilities have changed since 2009 and what barriers if any affect its implementation and 2 results of the nationwide eas test and federal efforts to address identified weaknesses tables and figures this is a print on demand report

*FEMA's Toxic Trailers* 2008 this is a print on demand edition of a hard to find publication for over three decades fema has provided temporary housing assistance to eligible victims of natural disasters fema has responded to more than a thousand disaster and emergency events over this period the cycle of help from sheltering provided by local org in the immediate aftermath to the eventual repair and rebuilding or replacement of private homes and rental units is the focus of this report contents intro post disaster housing sheltering and housing congressional issues a national disaster housing strategy descriptions and directions recent housing developments alternative housing pilot program katrina cottages individuals and households pilot program fema hud relationship special needs illustrations

**Catalog of FEMA Earthquake Resources** 2013 this timely book provides the inside story of the development of mobile public alert and warning technology in the united states and addresses similar systems being used in australia canada japan and the netherlands this book

provides a comprehensive account of how mobile smartphone systems are transforming the practice of public alert and warning in the United States. Recent events have vaulted mobile alert and warning technology to the forefront of public debates concerning the hazards of the digital age: false alarms of ballistic missile attacks on Hawaii and Japan, the non-use of mobile alerts during the Northern California wildfires, and the role this technology plays in supporting police manhunts and counterterrorism efforts. Drawing upon interviews with officials, executives, experts, and citizens, the book provides an in-depth analysis of the events and contexts influencing the trajectory of mobile public alert and warning and charts a course for its improvement. The book first introduces readers to the high stakes involved in the transformation of public alert and warning, explaining how new research is revealing the benefits, limitations, and risks of mobile technology in the disaster communication context. Three case studies then illustrate issues of risk, trust, and appropriateness in mobile public alert and warning.

**FEMA and Nuclear Powerplant Safety** 1986 Following the two damaging California earthquakes in 1989 (Loma Prieta) and 1994 (Northridge), many concrete wall and masonry wall buildings were repaired using federal disaster assistance funding. The repairs were based on inconsistent criteria, giving rise to controversy regarding criteria for the repair of cracked concrete and masonry wall buildings. To help resolve this controversy, the Federal Emergency Management Agency (FEMA) initiated a project on evaluation and repair of earthquake-damaged concrete and masonry wall buildings in 1996. The ATC-43 project addresses the investigation and evaluation of earthquake damage and discusses policy issues related to the repair and upgrade of earthquake-damaged buildings. The project deals with buildings whose primary lateral force-resisting systems consist of concrete or masonry bearing walls with flexible or rigid diaphragms or whose vertical load-bearing systems consist of concrete or steel frames with concrete or masonry infill panels. The intended audience is design engineers, building owners, building regulatory officials, and government agencies. The project results are reported in three documents: FEMA-306, *Evaluation of Earthquake-Damaged Concrete and Masonry Wall Buildings*; *Basic Procedures Manual*, which provides guidance on evaluating damage and analyzing future performance; and *Component Damage Classification Guides and Test and Inspection Guides*. FEMA-307, *Evaluation of Earthquake-Damaged Concrete and Masonry Wall Buildings*, Technical Resources, contains supplemental information including results from a theoretical analysis of the effects of prior damage on single degree of freedom mathematical models, additional background information on the component guides, and an example of the application of the basic procedures. FEMA-308, *The Repair of Earthquake-Damaged Concrete and Masonry Wall Buildings*, discusses the policy issues pertaining to the repair of earthquake-damaged buildings and illustrates how the procedures developed for the project can be used to provide a technically sound basis for policy decisions. It also provides guidance for the repair of damaged components.
