11 this book analyses the letters of marginalised groups of world war
i soldiers including black indian and disabled ex servicemen from a
linguistic perspective looking at issues such as descriptions of
disability identity and migration dealing with minority groups who
have long been rendered invisible and exploring how these writers
position themselves in relation to the other the author makes use of a
corpus assisted approach to examine identity construction and
performance shedding light on a previously under explored demographic
this book will be of interest to students and scholars of world war i
history language and identity psychological and physical disability as
well as readers seeking a fresh angle on a key period of 20th century
history computational methods for communication science showcases the
use of innovative computational methods in the study of communication
this book discusses the validity of using big data in communication
science and showcases a number of new methods and applications in the
fields of text and network analysis computational methods have the
potential to greatly enhance the scientific study of communication
because they allow us to move towards collaborative large n studies of
actual behavior in its social context this requires us to develop new
skills and infrastructure and meet the challenges of open valid
reliable and ethical big data research this volume brings together a
number of leading scholars in this emerging field contributing to the
increasing development and adaptation of computational methods in
communication science the chapter 2/12 this book were originally
published as a special issue of the journal communication methods and
