*A Lecture, Introductory to a Course on Obstetrics and the Diseases of Women and Children*  
2017-11-15 excerpt from a lecture introductory to a course on obstetrics and the diseases of women and children delivered november 5 1848 allow me to offer my salutations and extend to you all a cordial and earnest welcome to the halls of this university you have assembled for the purposes of instruction and self improvement and you have visited this school of medicine in the full hope that the principles of your profession will be properly inculcated and its great dogmas as transmitted to us by the venerable and learned fathers of our science faithfully expounded these are duties which our position necessarily calls upon us to discharge duties too sacred to be regarded lightly for they involve consequences momentous not only to you but to those also who are hereafter to be confided to your professional care in this school then you are to learn the principles which are to guide you in the treatment of disease and may they in the hour of peril when all around is gloom and darkness prove beacon lights to illumine your way to truth and science may they under those trying circumstances redeem the pledge which we make to you this night to spare no effort shrink from no labor necessary for the zealous and faithful performance of the trust imposed on us as your instructors to the faculty of this institution has been delegated the high privilege of preparing you for the emergencies of professional life soon you will be called upon to exhibit through your acts testimony of the fidelity with which you have pursued your studies testimony of the manner in which we your teachers have discharged our duty these are considerations which I know full well no member of this faculty can contemplate without appreciating to the full extent the fearful responsibility of his position and whatever may be the feelings of my colleagues on this subject I know they are deep and abiding allow me to say for myself personally that I never enter on the performance of duty in this university without a sentiment of apprehension and distrust it will however be my earnest care to consecrate to your service every energy of my mind and feeling as I do an undisguised interest in your advancement you may rely on my best efforts to impress upon you the principles and practice of the department assigned to me in this institution about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

???????????????? 2020 2020-03 ?????????? 0015????????? ???

**A practical and theoretical Treatise on the Diseases of the Skin** 2022-03-04 reprint of the original first published in 1866

**A Treatise on the Diseases of the Bones** 2023-05-01 reprint of the original first published in 1872 the publishing house anatiposi publishes historical books as reprints due to their age these books may have missing pages or inferior quality our aim is to preserve these books and make them available to the public so that they do not get lost

**A practical treatise on the Diseases of the Lungs and Heart, including the principles of physical diagnosis** 1854 reprint of the original first published in 1845

On the Diseases of Females: a Treatise Illustrating their Symptoms, Causes, Varieties, and Treatment, Including the Diseases and Management of Pregnancy and Lying-in. Designed as a Companion to the Author's "Modern Domestic Medicine." 2024-04-28 from an acclaimed author in the field this is a compelling study of the origins and history of the disease commonly seen as afflicting young unmarried girls understanding of the condition turned puberty and virginity into medical conditions and helen king stresses the continuity of this disease through history despite enormous shifts in medical understanding and technologies and drawing parallels with the modern illness of anorexia examining its roots in the classical tradition all the way through to its extraordinary survival into the 1920s this study asks a number of questions about the nature of the disease itself and the relationship between illness body images and what we should call normal behaviour this is a fascinating and clear account which will prove invaluable not just to students of classical studies but will be of interest to medical professionals also

**A Practical Treatise on the Diseases of Children** 1883 reprint of the original the publishing house anatiposi publishes historical books as reprints due to their age these books may have missing pages or inferior quality our aim is to preserve these books and make them available to the public so that they do not get lost

**A Practical treatise on the diseases of women** 1869 american national trade bibliography
