an intimate look at war through the lives of soldiers and their families at fort hood making war at fort hood offers an illuminating look at war through the daily lives of the people whose job it is to produce it kenneth macleish conducted a year of intensive fieldwork among soldiers

and their families at and around the us army s fort hood in central texas he shows how war s reach extends far beyond the battlefield into military communities where violence is as routine boring and normal as it is shocking and traumatic fort hood is one of the largest military installations in the world and many of the 55 000 personnel based there have served multiple tours in iraq and afghanistan macleish provides intimate portraits of fort hood s soldiers and those closest to them drawing on numerous in depth interviews and diverse ethnographic material he explores the exceptional position that soldiers occupy in relation to violence not only trained to fight and kill but placed deliberately in harm s way and offered up to die the death and destruction of war happen to soldiers on purpose macleish interweaves gripping narrative with critical theory and anthropological analysis to vividly describe this unique condition of vulnerability along the way he sheds new light on the dynamics of military family life stereotypes of veterans what it means for civilians to say thank you to soldiers and other questions about the sometimes ordinary sometimes agonizing labor of making war making war at fort hood is the first ethnography to examine the everyday lives of the soldiers families and communities who personally bear the burden of america s most recent wars

The American Cyclopædia 1984

this book is about how distinctions are drawn between civilians and combatants in modern warfare and how the legal principle of distinction depends on the technical means through which combatants make themselves visibly distinguishable from civilians the author demonstrates that technologies of visualisation have always been part of the operation of the principle of distinction arguing that the military uniform sustained the legal categories of civilian and combatant and actively set the boundaries of permissible and prohibited targeting and so legal and illegal killing drawing upon insights from the theory of legal materiality visual studies critical fashion studies and a dozen of military manuals he shows that far from being passive objects of regulation these technologies help to draw the boundaries of the legitimate target with its attention to the co productive relationship between law technologies of visualisation and legitimation of violence this book will be relevant to a large community of researchers in international law international relations critical military studies contemporary counterinsurgency operations and the sociology of law
