in *Unquiet Understanding* nicholas davey reappropriates the radical content of gadamer s philosophical hermeneutics to reveal that it offers a powerful critique of nietzsche s philosophy of language nihilism and post structuralist deconstructions of meaning by critically engaging with the practical and ethical implications of philosophical hermeneutics davey asserts that the importance of philosophical hermeneutics resides in a formidable double claim that strikes at the heart of both traditional philosophy and deconstruction he shows that to seek control over the fluid nature of linguistic meaning with rigid conceptual regimes or to despair of such fluidity because it frustrates hope for stable meaning is to succumb to nihilism both are indicative of a failure to appreciate that understanding depends upon the vital instability of the word this innovative book demonstrates that gadamer s thought merits a radical reappraisal and that it is more provocative than commonly supposed

this book brings into conversation western and orthodox hermeneutical schools one represented by hans georg gadamer and his followers while the other school is less focused around one person and yet displays common distinct features the main question of the book is how we can mediate not only the content of understanding of who we are in relation to each other to the world in which we live and to god but also comprehend the process of understanding across various historical periods the strengths and weaknesses of both positions are presented and it is shown how these two hermeneutical approaches can enrich each other the book argues that preserving both positions and indicating how they complement each other helps show the limits of encountering the transcendent reality that can be testified to by human language without being reduced to it as such

this book explores how hobbes s political philosophy has occupied a pertinent place in different contexts and how his interpreters see their own images reflected in him or how they define themselves in contrast to him appropriating hobbes argues that there is no hobbes independent of the interpretations that arise from his appropriation in these various contexts and which serve to present him to the world there is no one perfect context that enables us to get at what hobbes really meant despite the numerous claims to the contrary he is almost indistinguishable from the context in which he is read this contention is justified with reference to hermeneutics and particularly the theories of gadamer koselleck and ricoeur contending that through a process of distanciation hobbes s writings have been appropriated and commandeered to do service in divergent contexts such as philosophical idealism debates over the philosophical versus historical understanding of texts as well as in ideological disputations and emblematic characterisations of him by various disciplines such as law politics and international relations this volume illustrates the capacity of a text to take on the colouration of its surroundings by exploring and explicating the importance of contexts in reading and understanding how and why particular interpretations of hobbes have emerged such as those of carl schmitt and michael oakeshott or the international jurists of the seventeenth eighteenth and nineteenth centuries

this book discusses the ethical dimension of the interpretation of texts and events its purpose is not to address the neutrality or ideological biases of interpreters but rather to discuss the underlying issue of the intervention of interpreters into the process of interpretation the author calls this intervention the ethical aspect of interpretation and argues that interpreters are neither neutral nor necessarily activists he examines three models of interpretation all of which recognize the role that interpreters play in the process of interpretation in these models the question of the truth or validity of interpretation is dependent upon the attitude of interpreters these three models are 1 the principle of charity in interpretation in the two different versions defended by hans georg gadamer and donald davidson 2 the production of truth as developed by paul ricoeur and michel foucault and 3 the regulative principle in interpretation as formal validity claims as presented by karl otto apel and jürgen habermas and as benevolence or love as an epistemic virtue as defended by friedrich schlegel and friedrich schleiermacher the critical discussion of these three models which brings to the fore the different manners in which interpreters intervene in the process of interpretation as persons lays the foundations for an ethics of interpretation the ethics of interpretation will be of interest to scholars and advanced students working in hermeneutics 19th and 20th century philosophy literary theory and cultural theory

what is scientific about the natural and human sciences precisely this the legibility of our worlds and the distinctive reading strategies that they provoke that account of the essence of science comes from edith stein who as husserl's assistant 1916-1918 labored in vain to bring his massive Ideen to publication and then went on to propose her own solution to the problem of finding a unified foundation for the social and physical sciences stein argued that human bodily life itself affords direct access to the interplay of natural causality cultural motivation and personal initiative in history and technology she developed this line of approach to the sciences in her early scholarly publications which too soon were overshadowed by her religious lectures and writings and eventually were obscured by national socialism's ideological attack on philosophies of empathy today as her church prepares to declare stein a saint her secular philosophical achievements deserve another look

meaning discourse and society investigates the construction of reality within discourse when people talk about things such as language the mind globalisation or weeds they are less discussing the outside world than objects they have created collaboratively by talking about them wolfgang iebert shows that meaning cannot be found in mental concepts or neural activity as implied by the cognitive sciences he argues instead that meaning is negotiated and knowledge is created by symbolic interaction thus taking language as a social rather than a mental phenomenon discourses iebert contends can be viewed as collective minds enabling the members of discourse communities to make sense of themselves and of the world around them by taking an active stance in constructing the reality they share people thus can take part in moulding the world in accordance with their perceived needs
