tell us that the supreme court is independent from the elected branches and that independent courts better protect rights than their more deferential counterparts but are these facts or myths in this groundbreaking new work anna harvey reports evidence showing that the supreme court is in fact extraordinarily deferential to congressional preferences in its constitutional rulings analyzing cross national evidence harvey also finds that the rights protections we enjoy in the united states appear to be largely due to the fact that we do not have an independent supreme court in fact we would likely have even greater protections for political and economic rights were we to prohibit our federal courts from exercising judicial review altogether harvey s findings suggest that constitutional
