animal fiction in late twentieth century canada fulfils a vital contribution to the conversation surrounding animal representation as a point of continuity in national narratives and supports the idea that focusing on narratives of responsibility and care influences better relations with both non human animals and across settler indigenous boundaries alice higgs engages with on going debates regarding reconciliation by demonstrating that it is imperative to critique settler colonial environmental frameworks and place autonomy back into indigenous communities by bringing indigenous practices of custodianship and relationality to bear more generally this book also develops a number of conversations in animal studies in relation to the politics of representation higgs studies a range of canonical canadian authors demonstrating a progress across the period in which it is possible to identify the emergence of a literary pro animal turn

why are our environmental problems still growing despite a huge increase in global conservation efforts peterson del mar untangles this paradox by showing how prosperity is essential to environmentalism industrialization drove people to look for meaning in nature even as they consumed its products more relentlessly hence england led the way in both manufacturing and preserving its countryside and the united states created a matchless set of national parks as it became the world s pre eminent economic and military power environmental movements have produced some impressive results including cleaner air and the preservation of selected species and places but agendas that challenged western prosperity and comfort seldom made much progress and many radical environmentalists have been unabashed utopianists environmentalism considers a wide range of conservation and preservation movements and less organized forms of nature loving from seaside vacations to ecotourism to argue that these activities have commonly distracted us from the hard work of creating a sustainable and sensible relationship with the environment

tracing his own relationship with wolves from his rural south dakota upbringing through his formative years as a professional trapper to his landmark work as an internationally renowned wildlife biologist errington delves into our irrational fear of wolves he forthrightly criticizes what he views as humanity s prejudice against an animal that continues to serve as the very emblem of the wilderness we claim to love but that too often falls prey to our greed and ignorance a friend of aldo leopold errington was an important figure in the conservation efforts in the first half of the twentieth century during his lifetime wolves were considered vicious wantonly destructive predators by the mid 1900s they had been almost completely eliminated from the lower forty eight states their reintroduction to their historical range today remains controversial publisher s description

this book examines the reintroduction and recovery of the wolf in the northern rocky mountains the wolf was driven to brink of extinction through conscious government policy the endangered species act of 1973 provided the means for wolf s return which began in the carter administration and continues in the obama administration the battle over the wolf is part of a larger struggle over the management of public lands generating public law litigation interest groups brought suit in federal courts challenging the department of interior s implementation of policy the federal courts were required to interpret the statutory mandates and review interior s decisions to insure statutory compliance the analysis of this public law litigation demonstrates that the federal courts correctly interpreted the statutory mandates and properly supported and checked interior s decisions this book focuses on the controversial role of the courts in the resolution of public policy conflicts judicial skeptics argue that the courts should not get involved in complex public policy disputes as judges lack the expertise and information to make informed decisions judicial proponents by contrast argue that judicial involvement is necessary so federal courts can oversee federal agencies which are under conflicting pressure from interest groups the president congress and their own internal dynamics this book supports the conclusions of judicial proponents and points out that the federal courts have been instrumental in the return and recovery of the wolf to the northern rocky mountains

The Desperate People

1984-01

in all latitudes writers hold out a mirror leading the reader to awareness by telling real or imaginary stories about people of good will who try to save what can be saved and about animals showing humans the way to follow such tales argue that in spite of all destructions and tragedies if we are just aware of and connected to the real world around us to the blade of grass at our feet and the star above our heads there is hope in a reconciliation with the earth this may start with the emergence or rather the return of a nonverbal language restoring the connection between human beings and the nonhuman world through a form of communication beyond verbalization through a journey in anglophone literature with examples taken from aboriginal african american english canadian and indian works this book shows the role played by literature in the protection of the planet it argues that literature reveals the fundamental idea that everything is

connected and that it is only when most people are aware of this connection that the world will change exactly as a tree is connected with all the animal life in and around it texts show that nothing should be separated from shakespeare s theatre to ecopoetics from travel writing to detective novels from children s books to novels all literary genres show that literature responds to the violence destroying lands men and nonhuman creatures whose voices can be heard through texts
