is intended to promote an understanding of why program evaluation is a critical component of any health intervention and to stimulate discussion on ways to make evaluation of health interventions in developing countries more rigorous

Reconceptualising Evaluative Practices in HE

2011-06-01

i congratulate the authors on what i believe will be a very interesting and useful book the language is accessible and the structure of the argument is coherent and consistent this is a very interesting and significant contribution to the field of higher education in general and scholarship in evaluative practices in particular judyth sachs deputy vice chancellor and provost at macquarie university sydney australia with an increasing and arguably troubling confidence in the use of international league tables student surveys and research ratings to evidence the value of higher education such scrutiny of higher education evaluation practices has never been more timely i believe the book may contribute most in empowering evaluators themselves to ensure that the outcomes of evaluation can be used to inform strategic priorities and decisionmaking in more meaningful ways higher education review vol 44 no 1 october 2011 a considerable amount of time and effort is invested in attempts to control change and improve the higher education sector these attempts involve evaluative practice but we have not yet conceptualised the evaluations that take place so therefore the opportunity to understand the value and nature of different types of intervention is frequently missed this book seeks to dismantle traditional boundaries in approaches to evaluation assessing how value and worth is attributed to activities in higher education it looks at

these topics are interspersed with illustrative evaluation cases in such areas as education housing and military personnel evaluation

The CIPP Evaluation Model

2017-03-07

evaluators have always worked in diverse communities and the programs they evaluate are designed to address often intractable socio political and economic issues evaluations that explicitly aim to be more responsive to culture and cultural context are however a more recent phenomenon in this book jill anne chouinard and fiona cram utilize a conceptual framework that foregrounds culture in social inquiry and then uses that framework to analyze empirical studies across three distinct cultural domains of evaluation practice western indigenous and international development culturally responsive approaches to evaluation provide a comparative analysis of these studies and discuss lessons drawn from them in order to help evaluators extend their current thinking and practice they conclude with an agenda for future research

Culturally Responsive Approaches to Evaluation

2019-09-27

evaluation research findings should be a key element of the policy making process yet in reality they are often disregarded this valuable book examines the development of evaluation and its impact on public policy by analysing evaluation frameworks and criteria which are available when evaluating public policies and

Policy, Program and Project Evaluation

2020-11-02

practice and research of peace education has grown in the recent years as shown by a steadily increasing number of publications programs events and funding mechanisms the oft cited point of departure for the peace education community is the belief in education as a valuable tool for decreasing the use of violence in conflict and for building cultures of positive peace hallmarked by just and equitable structures educators and organizations implementing peace education activities and programming however often lack the tools and capacities for evaluation and thus pay scant regard to this step in program management reasons for this inattention are related to the perceived urgency to prioritize new and more action in the context of scarce financial and human resources notwithstanding violence or conflict the lack of skills and time to indulge in a thorough evaluative strategy and the absence of institutional incentives and support evaluation is often demand driven by donors who emphasize accounting given the current context of international development assistance and budget cuts program evaluation is considered an added burden to already over tasked programmers who are unaware of the incentives and of assessment techniques peace education practitioners are typically faced with forcing evaluation frameworks techniques and norms standardized for traditional education programs and venues together these conditions create an unfavorable environment in which evaluation becomes under valued de prioritized and mythologized for its laboriousness this volume serves three inter related objectives first it offers a critical reflection on theoretical and methodological issues regarding evaluation applied to peace education interventions and programming the overarching questions of the nature of peace and the principles guiding peace

congratulations you have right in front of you a treasure from within these pages you will be able to pick up a good collection of reformist ideas and concepts endowed with the potential to bring about an epoch making impact on all kinds of assessments or evaluations in general and in the academic performance evaluation of students in particular once it so happened that prasad was moved by a real life encounter with one of his long time friends who shared with him her sour experience as a student in a premiere educational institution it seems that when she inquired with the professor who gave her a b grade in a course in which she expected an a grade she was called to a side and explained that it was indeed a very high b and that after all the difference between a low a and a high b is only marginal however that marginal difference had resulted in her missing an admission into an elite graduate program which was her cherished dream unrealized prasad was ruminating on that episode during one of his casual walks on the sandy beach side off the institute campus on a beautiful thursday evening of the eighth of august two thousand two when he was visited by the slippery idea of squids fl owing over the tidal waves from the salty waters of the sea swashing on and off the sandy beach front yes that is it squids singular has indeed come as a unique blessing in disguise here squids stands for scale quantum unit interval domain size that is the most fundamental basis for the design of a measurement scale squids defines the scale precision squids is the key concept used in resolving the mystery behind the unacceptably chaotic behavior of the letter grading system and also in developing an alternative system design as well the proposed design for a novel students academic performance evaluation system has a tremendous potential to usher in a conceptual paradigm shift in all kinds of assessments or evaluations the mathematical fallacy that is mysteriously implied in the design of the letter grading system has been well brought out and resolved here although the problem has been well

analyzed and even a solution has been proposed herein there remains a substantial amount of work remaining the next stage is the task of convincing and or getting convinced by the concerned stake holders in academia that can then facilitate a smooth implementation of this novel proposal you are urged to take a pro active leadership role in the entire exercise to bring about the needed changes

Evaluation Methodology Basics

2005

provides a process for seismic evaluation of existing buildings in any region of seismicity buildings are evaluated to either the life safety or immediate occupancy performance level provides instruction to the evaluating design professional on how to determine if a building is adequately designed and constructed to resist seismic forces all aspects of building performances are considered in terms of foundation geologic structural hazard nonstructural issues reflects advancements in technology incorporates design professional experience incorporates lessons learned during recent earthquakes and much more
