Environmental Protection Agency (EPA)

2019

since 2009 the u s environmental protection agency epa has proposed and promulgated numerous regulations to implement the pollution control statutes enacted by congress critics have reacted strongly some both within congress and outside of it have accused the agency of reaching beyond the authority given it by congress and ignoring or underestimating the costs and economic impacts and overestimating the benefits of proposed and promulgated rules

Environmental Protection Agency

1972

environmental protection agency legislation

Environmental Protection Agency

2018-07-02

expanded to cover the bush administration and the beginnings of the clinton administration this exploration of one of the most critical problems of modern government and democratic politics is now more timely than ever through careful analysis of representative cases it evaluates the environmental protection agency s performance over its entire existence uncovers the mistaken premises that have clouded and distorted debate about environmental policy and shows how public officials might better preserve and promote constitutional democracy

environmental protection agency major management challenges

EPA Protecting Our Environment

1977

several major statutes form the legal basis for the programs of the environmental protection agency epa many of these have been amended several times the current provisions of each are briefly summarised in this report the pollution prevention act ppa seeks to prevent pollution through reduced generation of pollutants at their point of origin the clean air act caa requires epa to set mobile source limits ambient air quality standards hazardous air pollutant emission standards standards for new pollution sources and significant deterioration requirements and to focus on areas that do not attain standards the clean water act cwa establishes a sewage treatment construction grants program and a regulatory and enforcement program for discharges of wastes into u s waters focusing on the regulation of the intentional disposal of materials into ocean waters and authorising related research is the ocean dumping act the safe drinking water act sdwa establishes primary drinking water standards regulates underground injection disposal practices and establishes a groundwater control program the solid waste disposal act and resource conservation and recovery act rcra provide regulation of solid and hazardous waste while the comprehensive environmental response compensation and liability act cercla or superfund provides authority for the federal government to respond to releases of hazardous substances and established a fee maintained fund to clean up abandoned hazardous waste sites the authority to collect fees has expired and funding is now provided from general revenues the emergency planning and community right to know act requires industrial reporting of toxic releases and encourages planning to respond to chemical emergencies the toxic substances control act tsca regulates the testing of chemicals and their use and the federal insecticide fungicide and rodenticide act fifra governs pesticide products and their use

Environmental Protection Agency

1993*

environmental research has driven landmark improvements that led to the protection of human and ecosystem health recognizing the value of knowledge generated by environmental research and the ingenuity within academic and nonprofit institutions the us environmental protection agency epa created a program known as science to achieve results or star in 1995 star is epa s primary competitive extramural grants program a review of the environmental protection agency s science to achieve results research program assesses the program s scientific merit public benefits and overall contributions in the context of other relevant research and recommends ways to enhance those aspects of the program this report also considers the conclusions and recommendations of a prior national research council review of the star program 2003 the star program s research priorities in light of the nation s environmental challenges

and the effects of recent star funding trends on obtaining scientific information needed to protect public health and the environment

Tools and Rules

1978

sustainability is based on a simple and long recognized factual premise everything that humans require for their survival and well being depends directly or indirectly on the natural environment the environment provides the air we breathe the water we drink and the food we eat recognizing the importance of sustainability to its work the u s environmental protection agency epa has been working to create programs and applications in a variety of areas to better incorporate sustainability into decision making at the agency to further strengthen the scientific basis for sustainability as it applies to human health and environmental protection the epa asked the national research council nrc to provide a framework for incorporating sustainability into the epa s principles and decision making this framework sustainability and the u s epa provides recommendations for a sustainability approach that both incorporates and goes beyond an approach based on assessing and managing the risks posed by pollutants that has largely shaped environmental policy since the 1980s although risk based methods have led to many successes and remain important tools the report concludes that they are not adequate to address many of the complex problems that put current and future generations at risk such as depletion of natural resources climate change and loss of biodiversity moreover sophisticated tools are increasingly available to address cross cutting complex and challenging issues that go beyond risk management the report recommends that epa formally adopt as its sustainability paradigm the widely used three pillars approach which means considering the environmental social and economic impacts of an action or decision health should be expressly included in the social pillar epa should also articulate its vision for sustainability and develop a set of sustainability principles that would underlie all agency policies and programs
