The SAGE Handbook of Social Media Research Methods 2017-01-26 with coverage of the entire research process in social media data collection and analysis on specific platforms and innovative developments in the field this handbook is the ultimate resource for those looking to tackle the challenges that come with doing research in this sphere

Programming the Mobile Web 2010-07-23 today's market for mobile apps goes beyond the iPhone to include BlackBerry, Nokia, Windows Phone and smartphones powered by Android, WebOS and other platforms. If you're an experienced web developer, this book shows you how to build a standard app core that you can extend to work with specific devices. You'll learn the particulars and pitfalls of building mobile apps with HTML, CSS and other standard web tools. You'll also explore platform variations, finicky mobile browsers, Ajax design patterns for mobile and much more. Before you know it, you'll be able to create mashups using 2.0 APIs in apps for the App Store, App World, Ovi Store, Android Market and other online retailers. Learn how to use your existing web skills to move into mobile development, discover key differences in mobile app design and navigation including touch devices, use HTML, CSS, JavaScript and Ajax to create effective user interfaces in the mobile environment, learn about technologies such as HTML5, XHTML, MP and WebKit extensions, understand variations of platforms such as Symbian, BlackBerry, WebOS, Bada, Android and iOS for iPhone and iPad, bypass the browser to create offline apps and widgets using web technologies.

Haptics Technologies 2011-09-15 the term haptics refers to the science of sensing and manipulation through touch. Multiple disciplines such as biomechanics, psychophysics, robotics, neuroscience and software engineering converge to support haptics and generally haptic research is done by three communities: the robotics community, the human computer interface community and the virtual reality community. This book is different from any other book that has looked at haptics. The authors treat haptics as a new medium rather than just a domain within one of the above areas. They describe human haptic perception and interfaces and present fundamentals in haptic rendering and modeling in virtual environments. Diverse software architectures for standalone and networked haptic systems are explained and the authors demonstrate the vast application spectrum of this emerging technology along with its accompanying trends. The primary objective is to provide a comprehensive overview and a practical understanding of haptic technologies. An appreciation of the close relationship between the wide range of disciplines that constitute a haptic system is a key principle towards being able to build successful collaborative haptic environments. Structured as a reference to allow for fast accommodation of the issues concerned, this book is intended for researchers interested in studying touch and force feedback for use in technological multimedia systems in computer science, electrical engineering or other related disciplines. With its novel approach, it paves the way for exploring research trends and challenges in such fields as interpersonal communication, games or military applications.

Sociotechnical Enterprise Information Systems Design and Integration 2013-03-31 this book covers multiple systems and developments in design for businesses and enterprises of all sizes, highlighting the advancing technology and research in this area and proposing strategic approaches to manage risks and detect errors provided by publisher.

Mobile Lightweight Wireless Systems 2012-04-23 this book constitutes the thoroughly refereed post-conference proceedings of the third international ICST conference on mobile lightweight wireless systems, Mobilight 2011, held in Bilbao, Spain, on May 9-10, 2011. In numbers, Mobilight 2011 was organized as a 2-day single-track event with 18 technical presentations and 3 specialized workshops focused on opportunistic sensing and processing in mobile wireless sensor and cellular networks, Mobisense, multimode wireless access networks, Mowan and strategic network planning applied to market regulation, Netstrat, totaling to 34 papers presented during the conference and included in the proceedings.
