Global Secularisms in a Post-Secular Age 2015-10-16 given the central role that agriculture plays in the rural economy of africa several countries have implemented supply and demand driven policies and programs to promote sustainable fertilizer use with mixed results however not much has been said about the market structure or competitive behavior along the supply chain in the highly concentrated fertilizer industry nor about how this affects fertilizer uptake in the region globally the industry has only a few producers and african countries are highly and increasingly dependent on imported fertilizer locally fertilizer distribution channels are also characterized by a limited number of market actors often with a poor dealer network

Laws of Rise and Demise 2013-07-30 the paradox of a global usa describes the vexed relationship between the united states and globalization on the one hand the u s has vociferously promoted modernization and open markets both central components of the process of globalization on the other hand it appears to be resolutely determined not to live within an institutional framework of globalized authority as the world s only superpower the united states is often perceived as championing its own narrow national sovereignty for example by opposing the kyoto protocol and the international criminal court and by taking action in iraq outside the auspices of the un the book treats the paradox of american exceptionalism and globalization as a local happening within the broader process of globalization these essays analyze the ways in which the usa has both played a role in and reacted against emerging present day globalization examples are drawn from the fields of history political science cultural studies and economics making this collection one of the very few to link together so diverse a group of authors and approaches to the subject of global usa

Political Evil in a Global Age 2009 we live in a global age an age of vast scale and speed an age of great technological and economic and environmental change in conditions our ancestors could hardly have imagined what does this compression of geographical and temporal scale mean for our political thinking do we need new modes of political thought or a new kind of political imagination how might we begin to develop a truly global political theory against the common belief that we need a wholly new political theory for our global age susan mcwilliams argues that the best foundation is already behind us and can be found by traveling back in doing this revisiting the history of political thought with a mind to the questions accompanying globalization it becomes clear that the greatest tool for understanding our new world lies in one of the oldest themes in western political theory travel since the beginnings of western political thought the ancient greeks referred to travel as theoria political theorists have used images of travel to illuminate the central questions of globalization where travel stories appear we find serious reflection about how to live in cross cultural and interconnected political conditions here we find attention to the contingency of political identity to hybridity and to the threats of colonialism and imperialism we even find self critical questioning about the dangers that face political theorists who want to think globally in traveling back mcwilliams uncovers the rich travel story tradition of political theorizing that speaks directly to the problems of our age she explores why this travel story tradition has been so long neglected especially in this time when we need its wisdom and she calls for its rediscovery in order to move forward toward a global political theory as mcwilliams eloquently demonstrates we must first learn to travel back
