psychology s contribution to education has produced a persuasive and burgeoning literature willing to measure e g intelligence quotients categorise e g learning and or behavioural diffi culties and pathologise e g psychiatric disorders students across learning contexts practices like these pervade relationships existing between psychology and education because they share in common certain views of people and the worlds in which they learn there is however increased acknowledgement that contemporary practice demands alternate ways of working as learning communities and educators endeavour to make a difference in peoples lives they are critically questioning how their use of psychology in education constitutes future possibilities for personhood and psychosocial action in this book a group of respected international scholars examine controversies presently facing the enduring relationship between

psychology and education the book will appeal to readers who are interested in the innovative development and application of psychological theories and practices in to education the book will be of interest to transnational audiences and is accessible to scholars and students in disciplines including psychology education sociology social work youth studies public and allied health the volume includes contributions from tom billington christopher boyle lise bird claiborne tim corcoran greg goodman jack martin athanasios marvakis and ioanna petritsi jace pillay isaac prilleltensky anna stetsenko jeff sugarman and stephen vassallo with a foreword by ben bradley tim corcoran is senior research fellow and senior lecturer in critical psychology at the victoria institute victoria university melbourne australia he has extensive experience in educational psychology both as a school psychologist and researcher academic his work has involved teaching research and professional practice in australia the uk singapore and iraq

Foundations for a Psychology of Education

1989

written specifically for education studies students psychology and education is an accessible text that offers a clear introduction to educational psychology on education studies programmes it considers the key psychological ideas that will support students understanding of how different individuals and groups of individuals learn and behave in educational contexts and settings looking at factors that influence learning and attainment the book discusses themes such as the relationship between cognition and emotion emotional intelligence and motivation throughout the emphasis is on encouraging the reader to avoid stereotyping attributions and rigid views of learner ability

Psychology in Education

2014-05-13

originally published in 1979 this title is based upon professor stones extensive work with practising and student teachers his overriding concern is with the contribution of psychology to pedagogy to help practitioners improve their practice and theorists test their theories he develops the thesis that teaching involves the teacher in psychological experimentation thus one of the most important laboratories for testing the application of learning theories is the classroom the adoption of this view offers the potential for transforming teaching and our understanding of human learning unlike the majority of books in the field of educational psychology at the time it is not a synoptic anthology of the writings of the current gurus in the field or its close neighbours instead guides are given to teachers experimenters to plan try out and evaluate their teaching experimenting the central theme adopted at the outset and held throughout the book is the improvement of teaching through the explicit informed use of psychopedagogical principles

Psychology and Education

Educational Psychology

1997-08-11

this book sets out a proposal for applying psychological and educational psychology concepts to improve work with children and young people it also suggests how some of the criticism aimed at pedagogical psychology practice can be answered in several respects educational psychology practice seems to be in a transition phase and could even be said to be suffering an identity crisis educational establishments and education policy alike are looking for different skills than those the psychology profession traditionally provides and people are generally questioning the relevance and applicability of pedagogical psychological counseling the book is based on the fundamental premise that good professional practice

is contingent upon circumstances that allow practitioners to apply their knowledge experience and skills in the specific encounter with a specific task this means that the ability to act pragmatically and creatively is and will increasingly be an important skill not only for educational psychologists but also for psychologists in general in other words psychologists must be able to contribute to tasks in new ways and new contexts when required intended primarily for students of psychology school psychologists and other professional groups that provide counseling in schools the book is also a valuable resource for the various groups that use pedagogical psychology tools and insights in their work with children and young people

Psychology and Education

1993-06-30

this is volume viii of thirty two in a series on developmental psychology originally published in 1923 the author writes that our knowledge of human instincts and capacities of the processes of learning and remembering of mental work and fatigue and of individual differences and their causes has been much increased in the past score of years this briefer course represents a simpler treatment of the more fundamental subject matter of these volumes organized as a text book in educational psychology for students in colleges and schools

A Humane Psychology of Education

1936

psychology of education has long held a place in the curriculum for training teachers but what implications can psychological theory legitimately have for educational practice in this book the author makes a direct attack on the current role of psychology in education showing important differences between psychologistse tm and educatorse tm interests in topics such as learning motivation and development and questioning the validity of many of piagete tm s most fundamental ideas he compares two developmental theories that superficially have much in common e platoe tm s and piagete tm s e and focuses on their implications for learning in the classroom he shows why platoe tm s theory whether or not we agree with it serves as a model of a useful educational theory and why piagete tm s theory has no implications for education he reaches the conclusion that psychological theories and research based on them are irrelevant to educational practice
