intelligent design id argument intended to demonstrate that living organisms were created in more or less their present forms by an intelligent designer intelligent design was formulated in the 1990s primarily in the united states as an explicit refutation of the theory of evolution

the theory of intelligent design is simply an effort to empirically detect whether the apparent design in nature acknowledged by virtually all biologists is genuine design the product of an intelligent cause or is simply the product of an undirected process such as natural selection acting on random variations
