each year car manufacturers release new production models that are unique and innovative the production model is

the result of a lengthy process of testing aerodynamics safety engine components and vehicle styling the new technologies
introduced in these vehicles reflect changing standards as well as trends of the market from acura to volvo this book provides
a snapshot of the key engineering concepts and trends of the passenger vehicle industry over the course of a year for each
of the 43 new production models articles from automotive engineering international aeI magazine detail technology
developments as well as a comprehensive look at the 2013 passenger car models this book provides those with an interest in
new vehicles with all the information on the key automotive engineering and technology advancements of the year aeI s
association with sae international guarantees that these articles come from a trusted and reliable source with a reputation 100
plus years in the making the 2013 passenger car yearbook features articles covering a wide variety of topics from styling
safety testing hybrid systems powertrain designs lightweighting and materials interviews with key designers and engineers
offer the reader an in depth look at the strategies behind the year s technology advancements this yearbook is a must read to

any vehicle enthusiast or engineer the 2013 passenger car yearbook explores where automotive engineering and styling is heading in years to come and where it has come from in the past
