Novelties In String Theory - Proceedings Of The Johns Hopkins Workshop On Current Problems In Particle Theory 22

1999-10-05

this benchmark volume documents in comprehensive detail a major environmental crisis rapidly declining amphibian populations and the disturbing developmental problems that are increasingly prevalent within many amphibian species horror stories on this topic have been featured in the scientific and popular press over the past fifteen years invariably asking what amphibian declines are telling us about the state of the environment are declines harbingers of devastated ecosystems or simply weird reflections of a peculiar amphibian world this compendium presenting new data reviews of current literature and comprehensive species accounts reinforces what scientists have begun to suspect that amphibians are a lens through which the state of the environment can be viewed more clearly and that the view is alarming and presages serious concerns for all life including that of our own species the first part of this work consists of more than fifty essays covering topics from the causes of declines to conservation surveys and monitoring and education the second part consists of species accounts describing the life history and natural history of every known amphibian species in the united states

Amphibian Declines

julie blyfield is one of australia s leading contemporary jewellers her work has consistently kept pace with investigations of location identity and cross cultural understanding and involves an innovative engagement with traditional jewellery and metalwork techniques sourced from all over the world

Annual Report

1996

software product lines are emerging as a critical new paradigm for software development product lines are enabling organizations to achieve impressive time to market gains and cost reductions with the increasing number of product lines and product line researchers and practitioners the time is right for a comprehensive examination of the issues surrounding the software product line approach the software engineering institute at carnegie mellon university is proud to sponsor the first conference on this important subject this book comprises the proceedings of the first software product line conference splc1 held august 28 31 2000 in denver colorado usa the twenty seven papers of the conference technical program present research results and experience reports that cover all aspects of software product lines topics include business issues enabling technologies organizational issues and life cycle issues emphasis is placed on experiences in the development and fielding of product lines of complex systems especially those that expose problems in the design development or evolution of software product lines the book will be essential reading for researchers and practitioners alike

symposium in honour of gustav paumgartner

Examining the Current State of Cosmetics

2013

the mexican united states border represents much more than the meeting place of two nations our border communities are often a line of first defense absorbing the complex economic environmental and social impacts of globalization that ripple through the region in many ways our success or failure in finding solutions for the environmental social and economic issues that plague the region may well define our ability to meet similar challenges thousands of miles from the border zone border residents face the environmental security concerns posed by water scarcity and transboundary air pollution the planning and infrastructure needs of an exploding population the debilitating effects of inadequate sanitary and health facilities and the crippling cycle of widespread poverty yet with its manifold problems the border area remains an area of great dynamism and hope a multicultural laboratory of experimentation and grass roots problem solving indeed as north america moves towards a more integrated economy citizen action at the local level is pushing governments to adapt to the driving forces in the border area by creating new institutional arrangements and improving old ones if there is one defining feature of this ground up push for more responsive transboundary policies and institutions it is a departure

From the closed formalistic models of the past to a more open transparent and participatory model of international interaction

MICAI 2002: Advances in Artificial Intelligence

2003-08-01

this edited volume presents selected papers capturing herbert kelman s unique and seminal contributions to the social psychology of conflict analysis and resolution with a special emphasis on the utility of concepts for understanding and constructively addressing violent and intractable conflicts central concepts covered include perceptual processes basic human needs group and normative processes social identity and intergroup trust which form the basis for developing interactive methods of conflict resolution

Tourism

2000

this volume represents the seventh edition of the ecoop workshop reader a compendium of workshop reports from the 17th european conference on object oriented programming ecoop 2003 held in darmstadt germany during july 21 25 2003 the workshops were held during the first two days of the conference they cover a wide range of interesting and innovative topics in object oriented technology and offered the participants an opportunity for interaction and lively discussion twenty one workshops were selected from a total of 24 submissions based on their scientific merit the actuality of the topic and their potential for a lively interaction unfortunately one workshop had to be cancelled special thanks are due to the workshop organizers who recorded and summarized the discussions we would also like to thank all the participants for their presentations and lively contributions to the discussion they made this volume possible last but not least we wish to express our appreciation to the members of the organizing committee who put in countless hours setting up and coordinating the workshops we hope that this snapshot of current object oriented technology will prove stimulating to you october 2003 frank buschmann alejandro buchmann mariano cilia organization ecoop 2003 was organized by the software technology group department of computer science darmstadt university of technology under the auspices of aito association internationale pour les technologies objets in cooperation with acm sigplan the proceedings of the main conference were published as lncs 2743

Report of the ICES Advisory Committee on the Marine Environment, 1999, Copenhagen, Denmark, 31 May-5 June 1999

2000

consisting of selected technical contributions to the european project cost252 evolution of satellite personal communications from 2nd to future generation systems this volume provides many innovative results which can be the basis for new global mobile terrestrial satellite telecommunications systems providing multimedia services at high rates the latest research results and new perspectives on communications problems are presented in areas such as satellite systems management signalling and resource allocation cdma system and receivers protocols coding satellite atm and satellite umts the book deals with the satellite components for the third generation mobile umts imt 2000 systems the satellite component both geostationary and non geostationary constellations of satellites of the future systems offers in particular an effective mean for providing advanced mobile wideband multimedia services to users the world wide at rates up to 2mb/s satellite personal communications for future generation systems will be of particular interest for both researchers and telecommunications professionals

Southern African Development Community [2000 Consultative Conference Publications].

2000

this book constitutes the refereed proceedings of the 5th pacific asia

conference on knowledge discovery and data mining pakdd 2001 held in hong kong china in april 2001 the 38 revised full papers and 22 short papers presented were carefully reviewed and selected from a total of 152 submissions the book offers topical sections on mining text mining applications and tools concept hierarchies feature selection interestingness sequence mining spatial and temporal mining association mining classification and rule induction clustering and advanced topics and new methods

Plant Breeding Reviews

2019-10-07

the 1st world conference and technology exhibition on biomass for energy and industry held in sevilla in june 2000 brought together for the first time the traditional european conference on biomass for energy and industry and the biomass conference of the americas thus creating the largest and most outstanding event in the worldwide biomass sector the conference elaborated innovative global strategies projects and efficient practice rules for energy and the environment at a key stage in the industry s development new concepts and projects were highlighted to increase the social and political awareness for a change in worldwide resource consumption and to promote economically socially and environmentally sustainable development for the next millennium in 2 volumes the proceedings include some 470 papers essential to an understanding of current thinking practice research and global developments in the biomass sector a vital reference source for researchers manufacturers and policy makers involved or interested in the use of biomass for energy and industry

after a decade of major technical and theoretical advancements in the area the scope for exploitation of database technology has never been greater neither has the challenge this volume contains the proceedings of the 17th british national conference on databases bnco 2000 held at the university of exeter in july 2000 in selecting the quality papers presented here the programme committee was particularly interested in the demands being made on the technology by emerging application areas including web applications push technology multimedia data and data warehousing the concern remains the same satisfaction of user requirements on quality and performance however with increasing demand for timely access to heterogeneous data distributed on an unregulated internet new challenges are presented our three invited speakers develop the theme for the conference considering new dimensions concerning user requirements in accessing distributed heterogeneous information sources in the first paper presented here gio wiederhold reflects on the tension between requirements for on the one hand precision and relevance and on the other completeness and recall in relating data from heterogeneous resources in resolving this tension in favour of the former he maintains that this will fundamentally affect future research directions sharma chakravarthy adds another dimension to the requirement on information namely timeliness he shares a vision of just in time information delivered by a push technology based on reactive capabilities he maintains that this requires a paradigm shift to a user centric view of information

Herbert C. Kelman: A Pioneer in the Social Psychology of Conflict Analysis and Resolution

2017-01-18

this 2 day workshop is the culmination of a study of the status and future of marine biotechnology the overall goal of this workshop is to examine what was initially called opportunities for marine biotechnology in the united states to consider where we are now in this field of environmental marine biotechnology to envision the field in the future and to discuss any impediments that might be encountered along the way opportunities for environmental applications of marine biotechnology proceedings of the october 5 6 1999 workshop addresses the question of where the federal government should invest its limited funds and what future initiatives should be planned

as our knowledge of microelectromechanical systems mems continues to grow so does the mems handbook the field has changed so much that this second edition is now available in three volumes individually each volume provides focused authoritative treatment of specific areas of interest together they comprise the most comprehensive collection of mems knowledge available packaged in an attractive slipcase and offered at a substantial savings this best selling handbook is now more convenient than ever and its coverage is unparalleled the third volume mems applications offers a broad overview of current emerging and possible future mems applications it surveys inertial sensors micromachined pressure sensors surface micromachined devices microscale vacuum pumps reactive control for skin friction reduction and microchannel heat sinks among many others two new chapters discuss microactuators and nonlinear electrokinetic devices this book is vital to understanding the current and possible capabilities of mems technologies mems applications comprises contributions from the foremost experts in their respective specialties from around the world acclaimed author and expert mohamed gad el hak has again raised the bar to set a new standard for excellence and authority in the fledgling fields of mems and nanotechnology

Annual Report of the European Organization for Nuclear Research

2001

the author investigates proofs of correctness of realistic security protocols in a formal intuitive setting the protocols examined include kerberos versions smartcard protocols non repudiation protocols and certified email protocols the method of analysis turns out to be both powerful and flexible this research advances significant extensions to the method of analysis while the findings on the protocols analysed are novel and illuminating

Satellite Personal Communications for Future-generation Systems

2002-02-05

flint trade in the protohistoric levant offers an in depth case study of the production and exchange of tabular scrapers crossing cultural and ecological boundaries and traded from the desert to the settled zone these tools encompassed both ritual and quotidian functions over the course of well over the two millennia of the existence of the exchange system analyses focus on the changing nature of the production systems dynamics of value in changing contexts of production and use ritual contexts and meaning extending throughout the levant the tabular scraper complex is compared and contrasted to other contemporary production and exchange systems ceramics chipped stone ground stone copper beads offering a rich picture of the complexities of late prehistoric trade transcending linear evolutionary frameworks and simple models adopting a chaîne opératoire approach to the use life of the artifacts the artifacts can be seen to transform over time and place made used recycled and ultimately discarded each stage in its own cultural contexts the rise and decline of this exchange complex reflects both the geo political history of the region and the general role of lithic industries in these societies focusing on late prehistoric times in the near east the discussions will of relevance to all researchers interested in the role of exchange in the evolution of complex economies it offers an analysis of exchange systems based on a matrix of factors which should be of interest to all researchers interested in the evolution of trade
