nuclear power has been a contentious issue in japan since the 1950s and in the aftermath of the fukushima nuclear power plant disaster the conflict has only grown government agencies and the nuclear industry continue to push a nuclear agenda while the mainstream media adheres to the official line that nuclear power is japan s future public debate about nuclear energy is strongly discouraged nevertheless antinuclear activism has swelled into one of the most popular and passionate movements in japan leading to a powerful wave of protest music the revolution will not be televised protest music after fukushima shows that music played a central role in expressing antinuclear sentiments and mobilizing political resistance in japan combining musical analysis with ethnographic participation author noriko manabe offers an innovative typology of the spaces central to the performance of protest music cyberspace demonstrations festivals and recordings she argues that these four spaces encourage different modes of participation and methods of political messaging the openness mobile accessibility and potential anonymity of cyberspace have allowed musicians to directly challenge the ethos of silence that permeated japanese culture post fukushima moving from cyberspace to real space manabe shows how the performance and reception of music played at public demonstrations are shaped by the urban geographies of japanese cities while short on open public space urban centers in japan offer protesters a wide range of governmental and commercial spaces in which to demonstrate with activist musicians tailoring their performances to the particular landscapes and soundscapes of each music festivals are a space apart from

everyday life encouraging musicians and audience members to freely engage in political expression through informative and immersive performances conversely japanese record companies and producers discourage major label musicians from expressing political views in recordings forcing antinuclear musicians to express dissent indirectly through allegories metaphors and metonyms the first book on japan s antinuclear music the revolution will not be televised provides a compelling new perspective on the role of music in political movements

this book considers the ways in which muslims view the way they are being viewed not viewed or incorrectly viewed by the west the book underscores a certain will to visibility whereby muslims arabs wish just to be seen and to be marked as fellow human beings the author relates the failure to achieve this visibility to a state of desperation that inextricably and symmetrically ties visibility to violence when syrian and palestinian refugees recently started refusing to be photographed they clearly ushered the eventual but inevitable collapse of the image and its final futility the photograph has been completely emptied of its last remaining possibility of signification the book attempts to engage with questions about the ways in which images are perceived within cross cultural contexts why and how do people from different cultural backgrounds view the same image in opposing ways why do cartoon photographs and videos become both the cause and target of bloody political violence as witnessed recently by the deadly attacks against charlie hebdo in france and in the swift military response by the us jordan france and others to videotaped violence by isis
