a customer who complains is saying if only you will correct the situation i will continue doing business with you seeing our organizations as our customers do is critical to achieving excellence triple customer complaints helps determine how customers define excellence and establishes quantifiable ways to improve processes in order to meet and exceed customer expectations written for executives and process owners facing the real world challenge of creating and keeping customers it shows readers 1 how to walk in the customers shoes to identify which quality and operational performance measures should be tracked 2 how to define all aspects of a process as perceived by customers using a structured roadmap 3 how to use process qualification to achieve early measurable results 4 how to create a complaint management system that vacuums up all valid customer complaints 5 how to identify and map an organization s processes to ensure that the customer s point of view is primary

### Object-Oriented Technology. ECOOP 2003 Workshop Reader

2016-09-30

this book offers the latest advances and results in the fields of machine learning and deep learning for wireless communication and provides positive and critical discussions on the challenges and prospects it provides a broad spectrum in understanding the improvements in machine learning and deep learning that are motivating by the specific constraints posed by wireless networking systems the book offers an extensive overview on intelligent wireless communication systems and its underlying technologies research challenges solutions and case studies it provides information on intelligent wireless communication systems and its models algorithms and applications the book is written as a reference that offers the latest technologies and research results to various industry problems
