with this timely commitment jacques bidet unites the theories of arguably the world s two greatest emancipatory political thinkers in this far reaching and decisive text bidet examines marxian and foucauldian criticisms of capitalist modernity for marx the intersection between capital and the market is crucial while for foucault the organizational aspects of capital are what really matter according to marx the ruling class is identified with property with foucault it is the managers who hold power and knowledge that rule bidet identifies these two sides of capitalist modernity as market and organization showing that each leads to specific forms of social conflict against exploitation and austerity over wages and pensions on the one hand and against forms of medical and work based discipline control of bodies and prisons on the other bidet s impetus and clarity however serve a greater purpose uniting two souls of critical social theory in order to overcome what has become an age long separation between the old left and the new social movements
